#### Version 10.7.1

-----

- \* Rate change for UPS Ground Retail effective July 11 (Monday) 2016. This was also sent as an eUpdate for 10.6 and earlier users.
- \* Rate change for USPS First Class Parcel effective August 28 (Sunday) 2016. This was also sent as an eUpdate for 10.6 and earlier users.
- \* Added USPS shipping to Cuba.
- \* Open accounts are now displayed before closed accounts in the drop-down selection window on the customer edit screen.
- \* The option in register settings to group or separate shipping materials/labor now also applies to credit account statements, not just invoice account statements.
- \* Added new POS cash register function (button) for redeeming coupons.

- \* Added designator on POS receipt to indicate if ADV was used for a transaction.
- \* The FedEx logo is now the same for all FedEx services.
- \* Added new option to offer Wireless sales through GSS in CashMate.
- \* Enhanced mailbox notices to display all term options that are available and changed alignment to fit a #10 envelope window.
- \* Added setting in POS giving the option of forcing a tender type selection before allowing finishing of a transaction.
- \* Credit account statements are now automatically saved as .pdf after being created.
- \* Added the same account adjustment options that are available for credit accounts to invoice accounts.
- \* Added enhancement to allow for credit or negative balances on invoice statements.
- \* Added option to print invoice statements with any activity.
- \* Enhanced invoice management to include Reverse Payment and Apply Credit capabilities.
- \* Added option to change the cutoff date when creating credit account statements.
- \* Pro Pack no shipment packing jobs no longer have a pack later option.
- \* Added Pro Pack option to always allow filler in empty space.
- \* The Pro Pack item to be packed screen now allows for two places after the decimal.
- \* A confirmation receipt is now available for freight shipments.
- \* Added option to not print confirmation receipts on the fly.
- \* Retail rate setting screen enhanced to show margin/markup comparison when setting new retail rates.
- \* Customer rewards club option is now available for all AB stores.
- \* Expanded FedEx HAL [beta] for store groups 1 & 3 to more stores.
- \* Added enhancements to Cayan/EMV bankcard processing.
- \* Corrected for possible error when cancelling a credit card transaction.
- \* Added option to show tracking number for shipments on account statements.
- \* Corrected for possible incorrect calculation if adding then changing a discount on the POS register.
- \* Added enhancements for QB online.
- \* Added virtual receipts when using Trial or Training modes.
- \* Added option in PostalMate to reset the shipping date back to the current date after it had been advanced because of a carrier pickup.
- \* Added enhancements and new options for Freight Insurance.

- \* Added MTC insurance option for store groups 16 and 18.
- \* Added ADV reporting via FRED for AB store groups.
- \* Added functionality for stores located in Alaska and Hawaii to ship with PostalMate using dynamic rate requests from UPS and FedEx.
- \* A tracking number can now be copied from package history.
- \* Corrected for possible error if printing a customer statement from the customer edit screen on the last day of the month.
- \* Corrected for freight shipments now allowing more than 999.99 for an additional fee.
- \* Corrected for the possibility of a customer not carrying over to POS with a shipment where a Quick Postage transaction was included with the shipment.
- \* Corrected for the possibility of a customer statement not showing a reverse payment.
- \* Corrected for being able to close a customer invoice account that had current activity in the register.
- \* Corrected for the possibility of a customer invoice account transaction posting twice where account charge had been selected then cancelled and changed to Visa as the payment type.
- \* Corrected for the possibility of receipts and/or statements not displaying labor and/or materials correctly where Pro Pack Advanced was used and POS receipt settings was set to break out labor and materials.
- \* Corrected for quantity discounts on materials not showing until after a transaction was imported into CashMate.
- \* Corrected for customer register deposits not displaying correctly after converting to PostalMate from another program.
- \* Corrected for the possibility of customer history not displaying the first transaction correctly.
- \* Corrected for a closed customer invoice account not displaying last activity correctly on the customer edit screen.
- \* Corrected for the possibility of a shipment not discounting correctly at the POS register.
- \* Corrected for the PostalMate carrier billing report not displaying USPS tracking numbers correctly.
- \* Updated rates for RS insurance.
- \* Corrected for the add-ons UPS delivery confirmation and delivery confirmation w/signature being allowed with NDA Early.
- \* Added UPS NDA Early add-on option "Verbal Confirmation."
- \* Corrected for the possibility of a newly added customer not being selected at rate comparison if added on the fly while processing a shipment.
- \* Corrected for credit account invoices not displaying discounts that had been added at the register.
- \* Corrected for possible issue with carrier pack if filtering results.
- \* Corrected the possibility of UPS Oversize not calculating for certain dimensions.
- \* Updated Zip Codes.

#### Version 10.6.6

-----

- \* Corrected total taxes collected on sales tax report.
- \* Corrected for possible incorrect tax calculation in POS in certain cases where a discount was given.
- \* Updated FedEx HAL [beta] for store groups 1 & 3 because of FedEx changes.
- \* Corrected for possible issue when cancelling a credit card transaction.
- \* Enhanced EMV credit card transaction processing to be more intuitive.
- \* Added option in POS to print invoice statements with a negative or zero balance.
- \* Updated Zip codes.

#### Version 10.6.5 [Released]

-----

- \* Corrected for possible error when doing a USPS carrier pickup.
- \* Corrected for invoice receipts not showing line 2 of the ship to address.
- \* Corrected for the possibility of the database being larger in size than normal after doing the update.

#### Version 10.6.4 [Beta]

-----

- \* Corrected for invoice receipts and statements not showing retail for a declared value.
- \* Updated Sales Tax Report to show the reason for any overrides.
- \* Added Excel as a print option on the Alternate Insurance Report.
- \* Replaced borIndmm.dll with updated version 23.0.22248.5795 to fix possible USPS carrier pickup error.

#### Version 10.6.3 [Beta]

-----

- \* The POS Sales Tax Report now offers the normal print options (printer, screen or PDF) before printing.
- \* The POS Sales Tax Report now includes a section for tax override amounts.
- \* The POS Tax override button now triggers a screen that prompts the user for a reason for the tax override.
- \* Corrected for the Sales Tax Report not showing amounts in the Non-Profit section for transactions done by customers that had been set to default to the Non-Profit sales tax region for all their sales.
- \* Added stored credit card capabilities for Verifone point.
- \* eUpdates were sent on the effective dates for the following:

> Effective June 1 2016 the FedEx Ground Additional Handling Fee (\$10.50 N/C) now applies where the longest side of a ground package is 48" (formerly 60").

> Effective June 6, 2016 the UPS Ground Additional Handling Fee (\$10.50 N/C) now applies where the longest side of a ground package is 48" (formerly 60").

\* Corrected for System Utilities not staying open on an auxiliary workstation station if the master station was down.

\* Updated FedEx ARTH codes (store groups 1 & 3).

#### Version 10.6.2 [Beta]

-----

\* From POS>Tools>Options>AR Settings>Statements, the "Message" and "Box around message" settings have been removed because they are no longer used.

\* For store group 15 Confirmation receipt:

> Corrected for the possibility of an invalid estimated delivery date of 12/30/1999 showing.

> Added an asterisk (\*) after DV amount where alternate insurance has been used. The receipt is reprintable from package history.

> Added customer email and/or phone number to receipt.

\* Corrected for no rates or services showing at rate comparison on auxiliary workstations.

#### Version 10.6.1 [Beta]

-----

- \* Corrected for Dim Weight calculation not going out to more than 2 decimal places.
- \* Corrected for the possibility that Cayan Returns would not process correctly.
- \* Increased the number of characters allowable for find package by tracking number to 50.
- \* Corrected for the possibility of the Quick Postage screen showing exceeds max weight when it doesn't.
- \* Updated Zip Codes.

#### Version 9.9.2

-----

- \* Enhanced the Cayan Genius credit card interface to allow for stored credit cards and the ability to enter manual transactions.
- \* Corrected Cayan Genius to not allow voiding of debit transactions per payment processor rules.
- \* Corrected for the possibility of store group information getting removed when setting up an auxiliary station using the Setup Wizard.
- \* Corrected for the possibility of the update failing where multiple mail names had been incorrectly entered.
- \* Corrected for the possibility not being able to edit a customer with a delinquent status.
- \* Corrected for the possibility of Drop Offs not displaying correctly.
- \* Updated Google Maps to latest version.

#### Version 9.9.1

-----

- \* Added new "digital delivery" option to Mailbox Manager for SmartAlert users.
- \* Added new enhancements to Mailbox Manager for CMRA reports.
- \* Added new functionality to Mailbox Manager to save additional mailnames with addresses.
- \* Added new store groups for FRED reporting.
- \* Added new feature [beta] for store group 15 to record freight shipments.
- \* Updated Zip Codes, military Zip4 zips and zones.
- \* Updated Holiday tables for 2015.
- \* Updated DAS Zips for LSO.
- \* Modified PostalMate and the backup utility for faster performance.

#### Version 9.8.5

---

- \* Added error checking for transactions using the Cayan Genius credit card interface.
- \* Corrected customer data upload issues for Store Groups 1 and 3.
- \* Upgraded Email notifications for better performance and faster deliveries of Email.

#### Version 9.8.4

---

- \* Corrected for the possibility of the tax calculation in CM being off where discounts were added then changed on the fly.
- \* Corrected for being able to delete an item if splitting a transaction on hold in CM.
- \* Corrected for being able to add a row to the grid if splitting a transaction on hold in CM.
- \* Changed monthly reporting to weekly reporting for store group 3 (this was also sent as an eUpdate).
- \* Corrected for error setting FedEx Canada retail rates to suggested retail manually.
- \* Corrected FedEx Ground tax rate to Prince Edward Island.
- \* Corrected for certain ranges of CEF fees not calculating (this was also sent as an eUpdate).
- \* Added new credit card processor Cayan Genius.
- \* Added store groups 14, 15, 16 & 17.
- \* Updated Zip Codes.

#### Version 9.8.3

---

- \* Added enhanced options for mandatory dimensions feature.
- \* Added enhancement to automatically identify FedEx SmartPost drop-off return labels when scanned.
- \* Corrected dim weight minimum for LSO (this fix was also sent as an eUpdate).
- \* Corrected for certain drop-offs not showing detail in POS Package History.
- \* Added logic to compress the receipt image file in the database to further optimize database size.
- \* Corrected UPS Int'l. Extended Area Surcharge (this fix was also sent as an eUpdate).
- \* Corrected for error shipping UPS to England or Scotland.
- \* Corrected for error shipping UPS Int'l where the postal code had a space in it.
- \* Zip Code update.

#### Version 9.8.2

-----

- \* Corrected for the possibility of an error when processing a DHL shipment.
- \* Corrected for dimensions being required for all shipments after the option to require dimensions for all packages had been turned off.
- \* Corrected for possible error after selecting an international ship to.
- \* Corrected for possible customer record lock error when finishing a shipment.

#### Version 9.8.1

-----

- \* Rate change for UPS effective December 29 (Mon), 2014.
- \* Rate change for LSO effective January 1 (Thurs), 2015.
- \* Rate change for DHL effective January 2 (Fri), 2015.
- \* Rate change for FedEx effective January 5 (Mon), 2015.
- \* Rate change for OnTrac effective January 1 (Thurs), 2015.
- \* Updated Zip Codes.
- \* Corrected for the possibility of the inventory count not updating after doing a shipment.
- \* Corrected for not being able to reprint a POS receipt from history where no receipt had been printed originally.
- \* LSO Priority Overnight has been re-named LSO Priority Next Day.
- \* The OnTrac Signature Add-On has been split into commercial and residential.

- \* Added "Authorization Code" to receipt if using SignaPay for credit card processing.

#### Version 9.7.6

-----

- \* Corrected for the possibility of PostalMate being slow to open.

#### Version 9.7.5

-----

- \* Corrected for Global Discounts not showing on some POS reports.
- \* Corrected for possible slowness when retrieving Pro Pack shipments.
- \* Corrected upload report for store groups 1 & 3.

#### Version 9.7.4

-----

- \* Any user added carrier for OnTrac will now be renamed during the update. This was also corrected via an eUpdate.
- \* Made corrections to the account verification process for OnTrac.
- \* Corrected for possible error updating where a drop-off service had an incorrect department assigned. This was also corrected via an eUpdate.
- \* Corrected for the possibility of a USPS generic label not printing.
- \* Corrected for the possibility of a USPS shipping label printing too small.
- \* Corrected the uploaded report for store groups 1 & 3.
- \* Corrected for a possible error when editing promo pricing for a product. This was also corrected via an eUpdate.
- \* Corrected for the possibility of UPS commits not updating in certain scenarios.
- \* Corrected for some OnTrac surcharges not getting applied correctly.

#### Version 9.7.3

-----

- \* Added the open for next day option in PM for OnTrac shipments.
- \* Corrected for possible error when reprinting last labels.
- \* Made corrections to the OnTrac carrier pickup screen.
- \* Modified the Quick Postage screen to include add-ons in the total of the selected item.

#### Version 9.7.2

-----

- \* Corrected for the possibility of having to reset the scale after updating.
- \* Corrected for USPS Certified First Class Letter labels printing to the default Windows printer.
- \* Corrected for not being able to apply a 100% discount to an item at the POS Register.
- \* Added functionality that allows the grid columns to be sorted in POS>Tools>Options>Discounts and Special Pricing.
- \* Corrected for a POS receipt showing a "Saved" amount where it should not.
- \* Corrected for error at the POS register if selecting a product button that had a preset retail price that was blank.
- \* Corrected for global discounts getting applied where they should not where the default discount amount was not used.
- \* Corrected for not being able to set a label printer for OnTrac on an auxiliary workstation.
- \* Corrected for previous Promo pricing dates getting reset to the date of the 9.7.1 update.
- \* Corrected for error if more than one workstation (including the master) was at rate comparison at the same time. This was also sent as a eUpdate.
- \* Corrected for some tracking numbers getting truncated on the POS receipt.
- \* Corrected for the "No receipt" POS function not turning on/off correctly.
- \* Corrected for the possibility of the POS "Hold" and "Recall" functions not showing the red or green dot on their respective buttons.
- \* Corrected Mailbox Notices being sent to Gmail accounts showing meaningless characters in the column headings if the option to include the pricing matrix was turned off.

#### Version 9.7.1

- 
- \* Added new POS discounting features.
  - \* Added enhancements to the POS receipt display.
  - \* Improved POS register function names.
  - \* Updated the Firebird database to version 2.5.3.
  - \* Updated Zip Codes and Zones.
  - \* Added new feature, Quick PostalMate Setup Wizard for new installs of PostalMate.
  - \* Redesigned the PO Letter screen as "Quick Postage."
  - \* Made revisions to the PM Settings screen for easier access to shipping-related features.
  - \* Added support for regional carrier "OnTrac" for select beta sites.
  - \* Changed the POS register name back to CashMate.

- \* Added support for DHL packages greater than 150 lbs.
- \* Modified the default date in Find Package>Date Range to be today's date for the range.
- \* Corrected for possible error when selecting Tools>PM Settings>Departments & Products>Map.
- \* Corrected for PM failing to run on certain tablets and laptops running Windows 8.
- \* Corrected for the possibility of multiple swipes of a credit card being required if using SignaPay and an HID card reader.
- \* Added improved error messages if using SignaPay.
- \* Corrected for possible errors when using SignaPay if blank spaces were used when setting up the user and password.
- \* Corrected UPS Ground commits to Puerto Rico.
- \* Corrected for the possibility of the total not updating correctly at the Add-Ons screen when de-selecting/selecting certain add-ons for USPS Endicia shipments.
- \* Corrected for the possibility of the total at the Add-Ons screen getting truncated.
- \* Corrected for the possibility of a duplicate Account name being allowed if adding an account from the Mailbox Manager>Forwarding tab.
- \* Removed the option to add printers in Windows from the PM Settings>Label Settings page because of driver issues. Driver download links have been added to the Help file.
- \* Added the ability to set a printer with zero as the quantity. This is so a label can be printed from package history without being printed for every package.
- \* Added more selectable COM ports to PM Settings>Scale Settings.

#### Version 9.6.2

-----

- \* Corrected for error trying to ship a package where a preset insurance amount requiring a signature had been reached.

#### Version 9.6.1

-----

- \* Rate change for USPS Priority Mail effective September 7 (Sunday), 2014.
- \* Revised and moved the Add-Ons screen from Package Details to a new screen that precedes it.
- \* Revised backup screens to be more intuitive.
- \* Added logic to trap for possible access violations when switching from report printing to label printing.
- \* Corrected for changes to backup settings being allowed on auxiliary workstations.
- \* Corrected for possible "failed to prepare statements" error message in certain scenarios.
- \* Corrected for possible lockup at rate comparison when weight on the scale changed while switching tabs.

\* Corrected for possible error when adding a new mailbox and setting up mail notification with no email or phone on the customer record.

#### Version 9.5.3

-----

- \* Added new feature in System Utilities>Tools to allow setting various backup/restore options.
- \* Revised System Utilities Tools menu.
- \* Corrected for possible slowness doing certain actions in the Mailbox Manager.
- \* Corrected for checks being included in the total when closing the register day if they were not checked off on the Reconcile Check screen.
- \* Corrected for possible error when adding credit card information for a new customer from Mailbox Manager.
- \* Corrected for error when editing a customer if Mailbox Manager was disabled in POS.
- \* Corrected for error when enabling Mailbox Manager in POS.
- \* Corrected for old rates showing on emailed Mailbox Notices if the rates had been changed in Mailbox Manager.
- \* Corrected for emailed Mailbox Notices not showing changes to the message text.
- \* Correction to sales report for store group 3.

#### Version 9.5.2

-----

- \* Added new option to set the POS Mailbox Notice Delivery Method for all mailbox customers from POS>Tools>Setup>Renewal Notices>Setup for mailboxes (button).
- \* Corrected for error if adding a new customer from the Box holder Information screen when opening a new mailbox.
- \* Corrected for error when opening the Store Group screen from PM Settings.

#### Version 9.5.1

-----

- \* Added new feature to allow for the delivery of Mailbox Renewal Notices via email.
- \* Added new feature that gives the option to offer free months when renewing a mailbox.
- \* Added a new Mailbox tab to the POS customer record.
- \* Added a new POS report that will list Endicia Postage Purchases.
- \* Added two new POS reports to list customers with stored credit cards.
- \* Added enhancements to report processing for store groups 1 & 3.

- \* Added new feature to allow for FedEx Ground Residential delivery if the weight is greater than 70 lbs.
- \* Added enhancements to the PM Sidebar.
- \* Added changes to the UPS Registration process to comply with new UPS requirements.
- \* Updated zip codes and zones.
- \* Corrected country code for Kosovo.
- \* Corrected for the POS Sales and Marketing tool not working correctly on auxiliary workstations.
- \* Corrections to the multi-package shipping process where one or more packages were deleted before the shipment was finished at package details.
- \* Corrected for changes to the display order of products in Pro Pack Settings not saving.
- \* Corrections to the Inventory Report by Vendor.

#### Version 9.4.4

-----

- \* Corrected for certain services not resetting correctly if switching from Alternate Insurance back to Carrier-provided insurance.
- \* Corrected for the auto login to the PCS Website always going to the home page.
- \* Added option to override a carrier's free insurance amount, where alternate insurance is used, so the amount entered is sent to the alternate provider (located in PM>PMSettings>Insurance Settings).
- \* Corrected for certain zip codes in the 969xx range showing the incorrect zone for some USPS services (this fix was also sent as an eUpdate).

#### Version 9.4.3

-----

- \* Revisions to SmartAlert Free processing.
- \* Revisions to DHL processing.
- \* Added option (store groups 1 & 3 only) to set all customers to "Reward Club Members" from System Utilities>Tools.
- \* Activated the FedEx Express Residential Surcharge which is no longer waived for FASC customers as of 5/15/14 (this was also sent as an eUpdate).
- \* Corrected for the cash drawer opening before the receipt printed where the option to email receipts was enabled.
- \* Corrected for not being able to type in an amount using the keyboard at the register total screen if one of the tender type buttons was blank.
- \* Corrected the POS Voids and Returns report showing an incorrect value where a return was done for multiples of the same item.

\* Corrected for register history showing all credit card transactions as Visa where the NextPay interface was used and the new "Credit Card" tender type was used.

#### Version 9.4.2

-----

- \* Corrected for the FedEx Quick Rate Setting Utility not showing in certain cases after updating. This fix was also sent as an eUpdate.
- \* Corrected for error when processing a credit card where the X-Charge interface was being used.
- \* Corrected the POS "MC/Visa" tender type glyph and added a new glyph for the "Account" tender type.
- \* Removed POS "ATM" tender type glyph so the button only shows "ATM."
- \* Corrected for FedEx flat rate envelopes allowing more than 10 lbs. to be entered at rate comparison.
- \* Corrected filtering of flat rate services with "Least expensive" selected as the criteria.
- \* Corrected for a POS receipt not cutting off on the printer where the "Last Recpt" cash register function was used.
- \* Corrected for POS receipt email being too slow in some cases.

#### Version 9.4.1

-----

- \* Added new feature that allows for POS receipts to be sent via email.
- \* Added new FedEx flat rate services for carrier packaging.
- \* Added enhancements to PM Sidebar.
- \* Added enhancements to package history>find package>matching packages display grid.
- \* Added new report to POS for Voids and Returns.
- \* Added new "Credit Card" tender type in POS which will detect any type of card being used where a Credit Card Interface is enabled.
- \* Added functionality for PAYware Connect to process a credit card using a secondary server if the first try fails.
- \* Enhanced tender type button display to be larger and easier to read.
- \* Added capability to store a customer's credit card information (see the Update Guide for details).
- \* Added new button (Filtering options) at rate comparison that allows for filtering (on the fly) of services and/or the carriers that show.
- \* Added new tab (Filtering) in PM Settings>Additional Settings>Shipping Settings that allows for default filters to be set for rate comparison.
- \* Added new field to set a default report printer from PM Settings>Station Settings.
- \* Updated Zip codes and zones.

- \* Corrected for the PS6L scale weight displaying hundredths of an ounce in PostalMate (it should only go to tenths).
- \* Corrected for a POS receipt not including tenths of an ounce in the weight display where a PS6L scale was used.
- \* Corrected for a DHL label showing "Shipment Value Protection" where the value entered was covered by "implied indemnity".
- \* Corrected for the Cash Accounting Report not calculating tax correctly where a discount had been applied to the product.
- \* Corrected for USPS Priority mail not getting dim weight applied if shipping to certain US Territories.
- \* Removed Sudan as a shipping destination for DHL.
- \* Corrected for the email option not automatically coming up when renewing a mailbox.

#### Version 9.3.3

-----

- \* Updated USPS Zones.
- \* Updated holiday dates for 2014.
- \* Corrected for USPS Priority not calculating dim weight for the new zone 9 (this was also sent as an eUpdate).

#### Version 9.3.2

-----

- \* Corrected the month end report for store group 4.
- \* Corrected for the possibility of the Windows default printer not resetting.
- \* Corrected for the possibility of existing ELS credentials getting removed.
- \* Corrected USPS Approved Shipper wholesale rates.
- \* Updated FedEx zones.
- \* Corrected for the Cash Accounting Report not reporting sales tax for charges done on account.

#### Version 9.3.1

-----

- \* Rate change for USPS effective January 26 (Sunday), 2014.
- \* Rate change for DHL Global Mail effective January 26 (Sunday), 2014.
- \* Added 10:30 AM delivery option as an add-on for USPS Priority Mail Express.
- \* Added "SmartAlert Free" as an option in Mailbox Manager.
- \* Printable Postage integrated with Endicia Label Server (ELS).

- \* Updated USPS zones.
- \* Corrected for the possibility of the POS Inventory Report by Department not printing all pages.
- \* Corrected for rates not showing at rate comparison for FedEx First Overnight to Hawaii.
- \* Corrected for the vendor drop down list not sorting alphabetically from POS>Tools Adjust Inventory.
- \* Corrected for the possibility of a service for an additional carrier showing N/A at rate comparison after adding insurance where an alternate insurance provider was being used.

#### Version 9.2.1

-----

- \* Rate change for UPS effective December 30 (Mon), 2014.
- \* Rate change for LSO effective January 1 (Wed), 2014.
- \* Rate change for DHL effective January 2 (Thurs), 2014.
- \* Rate change for FedEx effective January 6 (Mon), 2014.
- \* Added support for PMTools in Mailbox Manager.
- \* Added support for LSO 2nd Day.
- \* Updated zip codes.
- \* Updated Country zones and Country codes.
- \* Corrected for having to exit and re-open the POS Customer Accounts screen after having set up a new account before being able to apply a credit to the new account.

#### Version 9.1.3

-----

- \* Corrected for the possibility of the update failing where certain old and obsolete mailbox information exists.
- \* Corrected for the possibility of UPS Ground showing a commit of "Verify with carrier" where it should not.
- \* Corrected for the possibility of a mailbox getting unassigned where incorrect information was added on the new "Mail Notifications" tab.
- \* Corrected for existing information in SmartAlert not showing in Mailbox Manager when adding Mail Notification if using the SmartAlert service.
- \* Corrected for the possibility of the Events log not including the username where security was enabled and a void was processed.

#### Version 9.1.2

-----

- \* Added enhancement to the ship to add/edit screen to automatically check for a possible Zip+4 when adding FPO ship to records.
- \* Added enhancement to mailbox manager to prompt for notification information when adding a new mailbox where notification is used.
- \* Added new filter to the Find Mailbox screen to filter records by mailboxes that have Mail Notification enabled.
- \* Corrected for possible error when updating an auxiliary workstation.
- \* Corrected for possible error when using Google Maps with certain browsers.
- \* Corrected for possible error from Mailbox Manager if using SmartAlert.

#### Version 9.1.1

-----

- \* Added enhancements to the Sales and Marketing tool.
- \* Added enhancements to uploading and reporting for store groups 1 & 2.
- \* Added enhancements for SmartAlert users to synchronize PM and SmartAlert databases.
- \* Added enhancements to Mailbox Manager.
- \* Added enhancements to PM Sidebar.
- \* Updated FedEx service areas.
- \* Added enhancements to customer import/search capabilities.
- \* Added minimum rates for some UPS services if using a custom discount tier.
- \* Added functionality to allow for Shipsurance to be used when doing Drop-Offs.
- \* Added functionality that gives users the option to require dim entry for shipments.
- \* Updated Zip codes.
- \* Updated delivery commits for FedEx service areas.
- \* Corrected for being able to delete a mapped department.
- \* Corrected for the POS Ultimate Report not showing an amount for a deleted department where no wholesale rate had been set.
- \* Corrected for air services not showing for some HI zip codes (this fix was also sent as a eUpdate).
- \* Corrected for the DHL GM label option not being available on an auxiliary workstation.

#### Version 9.0.5

-----

- \* Corrected for possible error in monthly franchise upload for store groups 1 & 3.

\* Corrected for customer information being in the wrong position on the main shipping screen if processing a Multiple Package Shipment with the option selected to use a different ship to or service.

#### Version 9.0.4

-----

\* Added enhancements to PM Sidebar.

\* Updated date/time display on PM Main shipping screen.

\* Corrected for an Out of Delivery Area surcharge not clearing at rate comparison for a Canadian FSA if multiple FSA's were typed in at the ProShip screen (the ship to's were not added or selected from the ship to screen).

\* Corrected for fuel surcharge not getting applied to some surcharges at rate comparison.

#### Version 9.0.3

-----

\* Corrected commit time for FedEx residential Std. Overnight, 2Day and Express Saver to 8 PM per FedEx changes. This was also sent as an eUpdate.

\* Corrected FedEx wholesale rate for Saturday pickup to zero (this fee is waived for FASC's). This was also sent as an eUpdate.

\* Added enhancements to PM Sidebar.

\* Added commit information "Verify with carrier" to rate comparison where no commit information was returned for an international shipment.

\* Corrected for a credit card transaction not cancelling from the card entry screen if the Windows close button ("X") was used to exit the screen instead of the "Cancel" button.

\* Made a change to the XML upload settings for RS Package Insurance per request from them.

#### Version 9.0.2

-----

\* Updated zip codes.

\* Adjusted rates for RS Package Insurance per RSA.

\* Corrected for not being able to select certain countries on the customs form under "Country of Manufacture" when shipping using UPS or USPS.

\* Adjustments made to the new PM Sidebar.

\* Corrected for error opening certain forms in PM if running Windows XP.

#### Version 9.0.1

-----

\* Added support for DHL Global Mail.

- \* Added support for RS Package Insurance.
- \* Added commits for DHL shipments at rate comparison.
- \* Added new option from PM Settings>Station Settings>"Size of transaction screens."
- \* Added Mailbox Activity History to customer screen from POS>Edit>Customer>History tab.
- \* Added new optional tool "Sidebar" available from PM>Tools.
- \* Updated PM Splash screen.
- \* DAZzle has been removed as an option from PM Settings>USPS Setup>Online shipping interface.
- \* UPS WorldShip has been removed as an option from PM Settings>UPS Setup>Online shipping interface. This change was sent as a eUpdate 08/05/2013.
- \* Corrected for the possibility of a newly added debit account balance forward not posting if the account was added from Edit Mailbox>Forwarding.
- \* Corrected for UPS Next Day Air Early AM not showing at rate comparison for some Alaska zips.
- \* Corrected for UPS Next Day Air Early AM not showing at rate comparison where the commit time was 9:30 AM.
- \* Corrected for not being able to select the UPS add-on "Shipper Release" at package details if C.O.D. had been selected first then cancelled.
- \* Corrected for the "Actual" Shipping amount showing under Labor when retrieving a Pro Pack later USPS shipment that had been processed using a USPS Flat Rate Box.
- \* Corrected for the residential charge showing at rate comparison in the top right box as suggested retail (the "B" amount) when processing a DHL residential shipment (there is no suggested retail for DHL).

#### Version 8.9.3

-----

- \* Added USPS changes effective 7/28/13.
- \* Corrected for auto-login to the UPS RPDO web site not working after the first login.
- \* Corrected for the possibility of a UPS International shipment having a Remote Area Surcharge applied twice.
- \* Corrected for the possibility of an error when doing a backup or restore.
- \* Added Myanmar to list of DHL supported countries.
- \* Corrected for the possibility of a DHL Letter getting sent to DHL as a package.
- \* Corrected for the DHL 10oz Letter discount not getting applied when setting a DHL Rate Program. This was also sent as an eUpdate.

#### Version 8.9.2

-----

- \* Corrected for the possibility of credentials not being automatically populated when going to the UPS RPDO web site.
- \* Corrected for error when printing the Reconcile Carrier Billing Report.
- \* Corrected for the possibility of a POS receipt total being incorrect if recalling more than one shipment that included a Pro Pack-No Shipment.
- \* Corrected for the Register Transaction History Report not displaying a description for drop-off transactions.
- \* Corrected for error when assigning a department to a register button.

#### Version 8.9.1

---

- \* Revised UPS Published rates to be UPS Standard rates instead of UPS Daily rates.
- \* Updated UPS tier level discounts.
- \* Added new feature that will allow for setting custom wholesale shipping rates.
- \* Added new feature to allow shipping to Mexico via web services if using LSO as a carrier.
- \* Added support for UPS 2nd Day Air Boxes.
- \* Changed the maximum weight for a DHL Letter from 8 oz. to 10 oz.
- \* Corrected for error shipping UPS Returns with Quantum View enabled.
- \* Corrected for insurance being allowed where it should not have been for USPS PMI shipments to the UK.
- \* Added Sudan as an available country for DHL shipments.
- \* Corrected for the Ship Info label total charges not being adjusted correctly after finishing a Pro Pack later shipment where the packing materials had been changed after retrieval.
- \* Corrected for the possibility of the default drop-off ship to record getting removed in Trial mode. The update also now checks for the record and replaces it if missing.
- \* Corrected for USPS Pro Pack shipments requiring contents to be entered.
- \* Corrected the maximum weight limit for shipments to Russia using USPS.
- \* Corrected for Ship To and Contents not printing on Drop-Off receipts or showing in package history.
- \* Corrected for shipping insurance mapping not resetting to default when disabling an alternate insurance carrier.
- \* Corrected wording on the DHL Manifest from "Large Package Fees" to "Over Sized Piece Charges" in the Totals section of the report.
- \* When closing Register Day, currency counts entered in Reconcile Cash screen now retained if screen is closed and re-opened.
- \* Corrected for USPS Return Receipt and Signature Confirmation being allowed at the same time where the shipment did not qualify for both.

- \* Corrected for the City name and State not updating when changing the zip on the POS Mailbox "Prepare and Print PS-1583 Form(s)" screen (Business Info. section).
- \* Corrected for the possibility of the screen freezing up when scrolling through a long list in package history.
- \* Corrected for USPS First Class shipments to an APO failing using ELS where the weight was 10 or 11 oz.
- \* Added checking for valid email address if processing a UPS Email Return label before processing the option.
- \* Corrected for the possibility of the "Last Statement" option being unavailable on the customer accounts screen where it should have been available.
- \* Corrected for the possibility of a newly added email to a customer record not saving.
- \* Corrected for the possibility of a ship to record that was included when doing a drop-off not showing in package history.
- \* Corrected for a drop-off that included a fee for taping and sealing showing in package history with the taping and sealing charge doubled.
- \* Corrected for drop-offs processed with no added fees showing on the POS "Unresolved Shipment Report."
- \* Corrected for a USPS Parcel Select Oversized package showing at rate comparison as N/A.
- \* Corrected for an existing product not showing when trying to assign it to a register button if it did not begin with a capital letter.
- \* Corrected for Certified and Return Receipt showing as available Add-Ons when processing a Postcard from the Mail a Letter screen.
- \* Added "Uploading transaction" dialog to the screen when finishing a UPS web services shipment.
- \* Corrected for Drop-offs showing on the PM Shipping Profit Report.
- \* Corrected for only the first package of a multi-package shipment getting an email notification.
- \* Corrected for the Time Clock Report not showing grand totals on the last page of a multi-page report.

#### Version 8.8.2

-----

- \* Corrected for drop-off email notifications not being sent.
- \* Corrected drop-off receipt to show the Package ID.
- \* Corrected for the possibility of DHL showing on the carrier pickup screen where there were no packages to be picked up.

#### Version 8.8.1

-----

- \* Released UPS web services as an option for all users.
- \* If using UPS web services, UPS Returns will include two new options:

- \* Print return label
- \* Email return label
- \* Added enhancements to Drop-Off:
  - \* Batch processing of multiple drop-offs
  - \* Carrier pickup screen now breaks out drop-offs from regular packages in the count
- \* Corrected for not being able to reprint a UPS shipping label from package history that had been shipped using Web Services.
- \* Added functionality to reprint a UPS Web Services EOD label from PM>Tools>Re-print>Last UPS Pickup Label.
- \* Corrected for UPS Web Services International shipments not showing on the Manifest Report.
- \* Changed the automatic box picker when doing a Pro Pack to pick the optimal box for a given object size based on Volume instead of Length + Girth.
- \* Corrected for possible error in POS after swiping a credit card on an HID device when processing a credit card payment using Payware or PCCharge.
- \* Corrected for the possibility of a POS credit card transaction being flagged as a manual entry where the card was swiped on an HID device with Payware or PCCharge as the payment interface.
- \* Updated holiday dates for 2013.
- \* Corrected for some settings not being saved when adding new products using "Add and duplicate" mode.
- \* Corrected for Product Edit>Buying & Inventory>Vendor Info>Vendor name allowing a vendor name to be typed in that did not exist in the vendor table.
- \* Corrected for the amounts in the "Expected" column not aligning evenly at the POS Close Register Day screen.
- \* Corrected for UPS Next Day Early AM shipments not requiring a first and last name when shipping using UPS Web Services.
- \* Removed UPS branding logo from screen at PM Settings>UPS Setup>Wholesale rates>Select Level.
- \* Added requirement at rate comparison if shipping UPS via Web Services if dimensions are entered, all 3 dimensions must be entered and each one must be greater than zero.
- \* Corrected POS Product Inventory Report by Department to calculate total value based on unit price.
- \* Corrected DHL Manifest Report to include "Over Sized Piece" and removed fields no longer used.
- \* Corrected for error tracking a USPS package. The "Delivery time" is temporarily not available.

#### Version 8.7.5

- \* Updated Drop Offs to auto-detect the new FedEx barcodes that use 32 numbers.
- \* Corrected for the possibility of a user having to login twice to finish a POS transaction.

- \* Corrected for CashMate+ lockup if adding a new mailbox and cancelling at the customer add screen.
- \* Corrected for the reminder to void a Dazzle shipment in Dazzle not coming up when voiding the shipment in PostalMate.
- \* Corrected USPS First Class rates coming up with the next higher rate for 2, 3, 6, 7, 10, or 11 oz letters.
- \* Fixed last label reprint from everyday tools for multi-package shipments.
- \* Extended Name/Company line across Ship Info label to allow for long company names.
- \* Corrected for rate comparison dates not advancing for DHL after doing the last pickup of the day.
- \* Corrected for rates from a previous shipment showing for a moment at rate comparison before the new shipment rates came up.
- \* Corrected the item count for Method 2 on the X-report.
- \* Corrected for possible lockup of PostalMate when fulfilling an auction estimate where the transaction was cancelled at the packing screen.
- \* Corrected for previously fulfilled auction item details showing at the new auction item entry screen after viewing it from package history.
- \* Corrected for previously selected customer not being on the screen after going back to the customer select screen from rate comparison.
- \* Corrected for closed dataset when adding Returns Plus to a UPS Ground shipment.

#### Version 6.0.6

-----

- \* Corrected for CashMate+ lockup if adding a new mailbox and cancelling at the customer add screen.
- \* Corrected for USPS primary insurance not carrying over to Dazzle.
- \* Corrected for the possibility of the name for an add-on at Package Details being too long.
- \* Corrected for Dazzle International labels not including the name of the service.
- \* Corrected for labor being included in the wholesale view at package history.

- \* Corrected for a customer not carrying over to the next package when doing a multi-package shipment if selecting a different Ship To or carrier service for the next package.
- \* Fixed bugs in the Quick Rate Setting Utility and PM Settings rate setting for FedEx tiers.
- \* Fixed eUpdates not working.
- \* Corrected for Saturday pickup options still showing after the last carrier pickup was done on a Saturday.
- \* Fixed last label reprint from everyday tools.
- \* Added new menu item in System Utilities: View > Network.
- \* In Network Settings, Workstation Name screen no longer appears when selecting a new Master station.
- \* New help files.

#### Version 6.0.5

-----

- \* Corrected error when launching System Check.
- \* Corrected for error when retrieving storepack estimate.
- \* Corrected for possible error when starting PostalMate on an auxiliary station in a network.
- \* Corrected for an account payment CashMate transaction clearing off the register after canceling from the register total screen.
- \* Corrected for Dazzle settings not working on an auxiliary workstation unless the master workstation had the same settings.
- \* Corrected product wholesale at package history and on the Profit Report.

#### Version 6.0.4

-----

- \* An access code is no longer required to set up a master workstation.
- \* Added a scale interface to the DHL Drop Off screen.
- \* Corrected the MailBox forwarding report not finding data.
- \* corrected for discount pricing not being recognized for filler when doing a storepack estimate.
- \* Corrected for labor not adjusting correctly when retrieving a storepack estimate and changing dimensions.
- \* Corrected for access violation if clicking on tabs at rate comparison with no rates showing.
- \* Corrected for customer statement reprints not showing the full customer address.
- \* Corrected for FedEx Freight showing at rate comparison when the weight was less than 151lbs.
- \* Corrected for dim weight not adjusting when retrieving a storepack estimate and changing the dimensions.

- \* Corrected for primary carrier insurance exporting to DazZle where alternate insurance was used in PostalMate.
- \* Corrected for package history showing a shipped auction item as voided.
- \* Corrected for rates not adjusting at rate comparison where the weight on a scale was changed.
- \* Added check on auxiliary workstations for master workstation running the same PostalMate version.

#### Version 6.0.3

-----

- \* Incorporated Ver. 5.9.2 changes.
- \* Corrected for dim weight information getting truncated on ship info label.
- \* Corrected for being able to click the account button multiple times when paying for a register transaction on account.
- \* Corrected for error if trying to close CashMate+ from PostalMate close with a transaction on the register.
- \* Corrected for being able to change published rates and an incorrect view of wholesale rates for FedEx fixed rate services from View/Edit Fixed Rates when selecting individual services.
- \* Corrected for wrong mailbox getting deleted or being unable to delete a mailbox from the mailbox setup menu.
- \* Corrected for package specifications not returning first if using Wizard Ship, having all auto prompts on, not entering a customer or ship to at the auto prompts, then adding a customer from the package specifications screen.
- \* Corrected for DHL Drop Off report not including totals at the end.
- \* Corrected for an Endicia transaction processing through DazZle where Endicia was turned off unless PostalMate was closed and re-opened after turning Endicia off.
- \* Corrected for USPS rates not coming up for APO/FPO zips at rate comparison.
- \* Corrected for FedEx Express showing rates where the dim weight was more than 150lbs.
- \* Corrected for customer statements not printing alternate addresses.
- \* Corrected for customer statements not printing detail lines for tax.
- \* Corrected for customer statements not printing the customer ID where an alternate address was used or where the statement was set up to be put in a mailbox.
- \* Corrected for the FedEx Express quick rate setting utility showing the wrong screen.
- \* Corrected for debit account payment voids or return voids posting as a positive amount to the account instead of negative.

#### Version 6.0.2

-----

- \* Corrected for not being able to void a register transaction done to a debit or credit account.

- \* Corrected for not being able to finish a register return transaction done to an account without the transaction posting multiple times before finishing.
- \* Corrected for PM closing when going back to package dimensions from package details if using Wizard Ship and processing a store pack estimate.
- \* Corrected for not being able to set retail rates to suggested retail for FedEx Express using the Quick Rate Setting Utility.
- \* Corrected for customer history screen not having transactions aligned correctly.
- \* Corrected for the package details screen not returning if attempting to process a UPS multi-package shipment without WorldShip installed.

## Version 6.0

-----

- \* Introduced new database (Firebird), including data conversion for existing users; previous database (Paradox) no longer used.
- \* Database now based on client-server model for networks (all data now resides on Master Station).
- \* Major performance enhancements on networked Auxiliary stations for many core operations.
- \* Redesigned Ship Info label.
- \* Enhanced layout of Shipment Transaction Listing Report (accessed from "Matching Packages" results in Find Package).
- \* Sales Tax Regions can now be assigned to individual customers.
- \* CashMate's Tax Override feature simplified; instead of the user selecting a different Tax Region, clicking the TxOverride now disables sales tax on subsequent line items.
- \* Redesigned Network Station Settings screen in System Utilities; Master station now selected by Windows computer name.
- \* Added View/Edit Network screen in System Utilities.
- \* Added Validate Database functionality in System Utilities; removed obsolete database utilities such as table rebuilds.
- \* Removed obsolete "Initiate Workstation Update" function from System Utilities.
- \* System Utilities program can now run without database connection (but functionality is limited).
- \* Added new "Database" tab in System Check program (replaces obsolete "BDE Settings" and "Aliases" tabs).
- \* Revised System Check report to reflect above changes in program.
- \* X-Report now lists amounts for all Sales Tax Regions set up in the system.
- \* New Help files.

## Version 5.9.2

-----

- \* Updated delivery commitments for FedEx Ground.

- \* Support added for FedEx organizational discounts effective August 14, 2006 (affects Store Groups 1, 3 and 5)
- \* Revised business rules for DHL Large Package Fee, as per DHL request: Weight over 90 pounds no longer triggers it; no longer applies to international services.
- \* Changed DHL Excess Limits fee to \$5.00.
- \* Corrected tab stop order at the package drop off screen.

#### Version 5.9.1

-----

- \* FedEx FASC discount tiers updated to conform to revisions by FedEx.
- \* FedEx drop-off broken down into three types: Express, Ground, and Return; no longer required to enter account number to record FedEx drop-off..
- \* DHL Excess Dimensions Fee is now applicable if second longest dimension is greater than 30 inches.
- \* Updated zip codes; updated delivery commitments for FedEx Express and Ground.
- \* Restored USPS Express Mail to Guam.
- \* Message dialog about DHL rate programs appears for certain store groups, when selecting NPC or PPP rate program.
- \* Corrected for DHL DAS not getting applied to the 10:30 AM service.
- \* Corrected for FedEx Ground Home Delivery wholesale discounts being 3 or 4 cents off.
- \* Corrected for FedEx Express Int'l insurance fee including the first \$100 if the total declared value was over \$100.
- \* Corrected for fuel surcharge not rounding up for wholesale rates at rate comparison, and both retail and wholesale when posting.
- \* Corrected for error when attempting to add an insurance carrier for an additional shipping carrier.
- \* Corrected for the Shipping Profit Report not showing a discount if there was only one discount given from package details.
- \* Corrected for the Drop Off Report using the current "Amount" for all transactions.
- \* Corrected for FedEx Ground AK/HI rural shipments not including the rural charge in a fuel surcharge calculation.

#### Version 5.8.5

-----

- \* Updated delivery commitments for FedEx Ground.
- \* Added link for "PictureItPostage" (Endicia product) to Order Supplies Online screen.
- \* Store Group 4 can no longer change Revenue departments to HASH, or add new HASH departments, as per corporate request.

#### Version 5.8.4

-----

- \* Corrected for possibility of DHL retail profit margins not all converting correctly for weight-based services, if using the Quick Rate-Setting Utility to set new retail rates based on previous margins.

#### Version 5.8.3

-----

- \* Corrected for possibility of DHL Large Package Fee getting incorrectly applied to DHL @home services.
- \* Corrected for fuel surcharge amount for DHL Large Package Fee being allocated as labor on a retrieved StorePack estimate.
- \* Corrected for possibility of FedEx Tier and corresponding wholesale rates not getting set when using the Express/Ground Quick Rate Setting Utilities.

#### Version 5.8.2

-----

- \* Updated delivery commitments for FedEx Ground.
- \* UPS 2nd Day Air Saturday Delivery option no longer limited to commercial destinations.
- \* DHL Large Package Fee now applies to non-Ground services, as per DHL rule correction on 02/03/06.
- \* Corrected for possibility of OS1 being applied when L+G=>84" instead of the proper L+G>84", for all ground services (incorrect calculation introduced in 5.8.1)
- \* Corrected for possibility of being required to enter or select a ShipTo record for USPS when not appropriate, in certain cases with the Endicia interface enabled.

#### Version 5.8.1

-----

- \* DHL domestic and international rates updated for rate change effective 02/05/06 (via date-based rate upload).
- \* DHL fuel surcharges now applied to additional portions of shipping charges: DAS; Saturday Pickup/Delivery; Remote Area Surcharge; Large Package Fee.
- \* Support added for new DHL Large Package Fee.
- \* Revised log-on control layout on Main Register, corrected truncation of text display.
- \* Endicia/DAZZle interface's 'Stealth' mode now disabled for any shipment with USPS insurance, to accommodate change in new DAZZle version.
- \* Added usage/group data function.
- \* Added eUpdates info to System Check display and log.
- \* Added new Store Group (ID 7).

- \* Corrected 29 USPS International Parcel Post rates which were based on inaccurate USPS document; duplicate of correction made via eUpdate prior to 5.8.
- \* Corrected for the DHL Delivery Area Surcharge wholesale rate not getting set automatically when selecting a Rate Program from PostalMate Settings.
- \* Corrected for DHL Rate Program displaying as "None" in PostalMate Settings if Rate Program was selected via the DHL Quick Rate-Setting Utility.
- \* Corrected for the possibility of a UPS shipment importing into WorldShip with Additional Handling being inappropriately included for StorePacks retrieved under certain conditions.
- \* Corrected for possible "Lock file has grown too large" error when attempting to print a FedEx Manifest Detail Report with a wide date range.
- \* Updated zip codes; updated delivery commitments for DHL air and FedEx Express.
- \* UPS Tier Level discounts for Store Group 5 updated to conform to revisions by UPS effective 01/23/06.

#### Version 5.7.1

-----

- \* FedEx Express domestic and international rates updated for rate change effective 01/02/06.
- \* FedEx Ground rates updated for rate change effective 01/02/06.
- \* UPS domestic and international rates updated for rate change effective 01/02/06.
- \* USPS domestic and international rates updated for rate change effective 01/08/06.
- \* Loading of new carrier rates is now a separate activity from updating to new PostalMate version, to allow more flexibility.
- \* Support added for UPS 2nd Day Air Saturday Delivery option, available in PostalMate as of 02/01/06.
- \* Support added for UPS 2nd Day Air AM 10:30 commitment, available in PostalMate as of 02/01/06.
- \* Updated delivery commitments for FedEx Express and UPS, and Delivery Area Surcharge designations for DHL, FedEx and UPS.
- \* Updated country-to-rate group assignments for USPS Parcel Post Air and Global Express Mail, effective 01/08/06.
- \* USPS Registered for Canada is now a single flat rate, instead of by dollar ranges; user is no longer prompted to enter amount when selecting this Add-On in Package Details.
- \* PC Synergy fax number updated on "Break Security" screen in System Utilities.
- \* Corrected for possibility, in certain situations, of a CashMate+ credit card payment being posted as a negative amount in PCCharge, when the last register item was a Return.
- \* Corrected for the possibility, under certain conditions, for the 'Counted' total for a given Tender Type to be incorrectly displayed as \$0.00 on the Close Register Day screen.
- \* New Help files.

#### Version 5.6.6

-----

\* CashMate+ now correctly records register "split tender" payments when the same Tender Type (i.e., cash) is used more than once in a single transaction; affects cash drawer amount and receipt.

#### Version 5.6.5

-----

\* Corrected for possibility of eUpdates feature (for fuel surcharges) not working properly, generally in cases where PostalMate was updated to version 5.5, but not launched before updating to 5.6.

\* Additional correction for credit card payments being inappropriately posted as manual data entry transactions in PCCharge when card info was input via mag reader (fixed in 5.6.4, but was still a problem with certain MagTek models).

#### Version 5.6.4

-----

\* Corrected for credit card payments in which card info was input via mag reader being posted in PCCharge as manual data entry transactions.

#### Version 5.6.3

-----

\* Corrected for the possibility of a credit card tender type not showing in CashMate+ when closing the Register Day, where a split tender was used and the card amount was less than \$.50.

\* Corrected the size of the System Utilities screen.

\* Corrected for possible access violation when attempting a backup from the prompt when closing PostalMate.

\* Corrected for possible deletion of TransactionType table when closing PostalMate.

#### Version 5.6.2

-----

\* Added support for PCcharge "Pro" software with the PCCharge INterface feature (only PCCharge "Payment Server" software was supported in 5.6.1)

\* Corrected for the possibility of UPS 2nd Day Air AM displaying on Rate Comparison with no rate.

#### Version 5.6.1

-----

\* Added support for FedEx Suggested Retail (also known as "counter") rates, for both Express and Ground.

\* Added PCCharge Interface for credit card payment processing from within CashMate+.

\* Added eUpdate Settings in System Utilities; allows enabling/disabling of eUpdates, and control over time of day for auto downloads.

- \* Added links to corporate intranet sites for Store Groups 1 and 3.
- \* Updated Holiday information.
- \* Updated USPS international business rules for all applicable countries, through Postal Bulletin 22166.
- \* Updated zip codes; updated delivery commitments for FedEx Express.
- \* FedEx Manifest Detail report now includes the new signature option add-ons.
- \* For FedEx Ground Commercial C.O.D. shipments, Direct Signature option can no longer be selected (FedEx provides at no extra charge for C.O.D. shipments).
- \* Corrected for possible index error if attempting to undelete a Tax Region from System Utilities.
- \* Corrected for possible access violation if attempting to do a backup when closing PostalMate (from System Utilities it was OK).
- \* Corrected for possible error on Add Ship To screen, if country is selected by manually typing in, using all lower case letters.
- \* Corrected for possibility of abnormal PostalMate launch due to Find Package query.
- \* Corrected for possibility of online transaction processing not working, with modem internet connection, until e-updates manually downloaded from System Utilities.
- \* New help files.

#### Version 5.5.5

-----

- \* Corrected for error when attempting to set UPS retail rates using UPS Suggested Retail rates from the main menu.
- \* Corrected for shipments voided at the CashMate+ register not voiding in PostalMate.
- \* Corrected for index error when attempting to print a Unit Sales Report for the previous month (Store Group 3 only) .
- \* Corrected for Dazzle XML special instruction script transferring to WorldShip as miscellaneous instructions where a WorldShip transaction followed a Dazzle transaction.
- \* Corrected for index error when attempting to run a Mailbox CMRA Quarterly Report.
- \* Corrected for newly added departments not being included in the detail of the CashMate+ Cash Accounting Report unless the order of the new department was reset using System Utilities.
- \* Corrected for possible data error that may impact Mass Fee Late Report.

#### Version 5.5.4

-----

- \* Corrected for errors when attempting to access secure areas with security enabled.

#### Version 5.5.3

-----

- \* UPS drop-off functionality revised; accessibility becomes restricted by date.
- \* Corrected for the Mailbox Manager only being available from one station on a network.
- \* Corrected for error when attempting to run the CashMate+ Purchasing Report.
- \* Corrected for error when attempting to run the CashMate+ Register Activity report if the cash register day was open.
- \* "TOTWHS" field in the electronic version of the DHL Volume e-mail report now includes DHL amounts in addition to those for other carriers..
- \* Corrected for PostalMate Shipping Transaction Listing by customer not working.
- \* Corrected for possible network update message coming up for stand-alone or master stations.
- \* Corrected for error when attempting to print a Unit Sales Report (Store Group 3 only).

#### Version 5.5.2

-----

- \* Corrected for Online FedEx Voids getting set as incomplete transactions.
- \* Corrected for error on launch of PostalMate if the version 5.5 update was run on a system already on version 5.5.
- \* Corrected for index error if attempting to sort mailboxes by column heading when adding a new mailbox.
- \* CashMate+ will no longer allow a "Due Date" less than or equal to the current day when creating statements.

#### Version 5.5.1

-----

- \* Added support for new FedEx Signature Options; removed support for obsolete Signature Release.
- \* New label format for FedEx internet shipments (2D bar code).
- \* Added automatic fuel surcharge updating via new eUpdates feature.
- \* Added support for UPS Tier Level discounts for Store Group 1.
- \* Dimensions and actual rounded weight now included in all internet FedEx package uploads, as per FedEx directive.
- \* More dynamic verbiage on Package Details screen for UPS Delivery Confirmation.
- \* Revised values sent in FedEx Version Capture, as per FedEx directive.
- \* Updated delivery commitments for DHL air/ground and FedEx Express; for systems updating from 5.4.3 or earlier, new commits for FedEx Ground and UPS Air.
- \* Disabling of Franchise data upload feature now requires password from franchise headquarters (Store Group 3 only)..
- \* Corrected for the business zip code not showing a change on the 1583 form in Mailbox Manager.
- \* Corrected for the Charge Account Report in CashMate+ displaying four places after the decimal in the totals.

- \* Option at Package Details to not auto process a package in WorldShip now works properly.
- \* Corrected for "invalid pointer" message on first launch of a new install where WorldShip was not installed.
- \* Mass Late Fee report in CashMate+ no longer includes multiple lines for the same customer.
- \* Corrected for the Ship Info label including packing materials in the total that had been deleted when a StorePack was retrieved.
- \* DHL Drop-Off Report now displays the proper account number in the header.

#### Version 5.4.6

-----

- \* Corrected for E-Report (DHL Volume or UPS Drop-Off) transmission failure upon first attempt after launching PostalMate
- \* Corrected for failure of franchise data upload in CashMate+ upon first attempt when closing the Register Day (Store Group 3 only).

#### Version 5.4.5

-----

- \* Corrected for existing tax regions and categories not showing in the drop-down list when adding or editing other tax regions or categories in CashMate+.
- \* Corrected for Rate Comparison displays getting truncated in Wizard Ship mode.
- \* Corrected for cursor not being positioned in the SKU entry box when entering an SKU manually from CashMate+.

#### Version 5.4.4

-----

- \* Updated zip codes; updated delivery commitments for UPS air and FedEx Express.
- \* Up to \$100 declared value now allowed for DHL@home services.
- \* Corrected for only the first letter typed being recognized when finding a country when using Pro Ship.
- \* Corrected for possible "record locked" error after editing Store Information.
- \* Corrected for USPS Letter-Post Economy International transferring to DAZZle as a regular parcel.
- \* Corrected for a newly added customer not being automatically selected after being added using Pro Ship.
- \* Corrected for auto prompts not working after the weight prompt where the previous shipment had been cancelled from the weight entry screen.
- \* Corrected for "Enter" on the keyboard not advancing all screens when using auto prompts.
- \* Corrected for possibility of the 'Last Inventory Adjustment' and 'Last Add Date' getting set incorrectly to 1/1/1988 for all products (including existing products).

- \* Corrected for WorldShip files not getting copied to the WorldShip directories from PostalMate on a new install of WorldShip.
- \* Corrected for possible error when cancelling the addition of a new product to the database.
- \* Corrected for error when attempting to run a Purchasing report in CashMate+ after cancelling the addition of a new product to the database.
- \* Corrected sizing/position issues with main shipping screens.
- \* Corrected for possible "Server did not respond" message when doing an on-line shipment where the shipment did complete successfully.
- \* Corrected for possible "E-Mail not sent" and other error messages when sending an E-Report (DHL Volume or UPS Drop-Off), when e-mail was actually sent successfully.

#### Version 5.4.3

-----

- \* Corrected for possible error condition with WorldShip interface after updating from 5.3 to 5.4.2 (WSEExport.dll now properly replaced).

#### Version 5.4.2

-----

- \* UPS Tier Level discounts for Store Group 3 updated to conform to revisions by UPS effective 05/13/05.
- \* UPS drop-off labels with "06" service indicator embedded in tracking # are now logged as Ground instead of Air; minimum number of characters now 11 instead of 18.
- \* Endicia/DAZZle interface now allows data entry and printing of customs forms on plain paper directly through DAZZle for USPS Global Express Mail (thermal labels no longer used for this service, effective with DAZZle version 5.0).
- \* Updated delivery commitments for DHL air.
- \* Corrected for access violation errors relating to scale interface.
- \* Cursor now properly positioned in search field on Customer Find screen when accessed from PostalMate main menu.
- \* Corrected for possibility of a "This Customer does not contain..." warning message displaying when adding a new customer in cases where the required data was in fact entered.
- \* Help button on Drop-Off Reports screen now calls correct topic.

#### Version 5.4.1

-----

- \* Added Endicia/DAZZle interface setting for having Delivery Confirmation pre-selected when shipping via Priority Mail.
- \* Added Endicia/DAZZle option for selecting a future mailing date to go on shipping label.
- \* UPS ASO Tier Level discounts updated to conform to revisions by UPS effective 05/09/05.
- \* Added UPS Ground services to AK/HI/PR to Tier Level discounting.

- \* Added DHL Volume Report, including electronically transmitted version.
- \* UPS Drop-Off feature redesigned; now includes electronic reporting.
- \* Added E-Report History feature in conjunction with the above.
- \* Removed password access restriction for franchise data upload feature in CashMate+ (Store Group 3 only; in beta testing since version 4.9.1).
- \* Corrected typos on rate-setting screen for Insurance Rate Groups and on message dialog advising to close auxiliary stations when backing up.
- \* All new help files, now HTML-based; includes cosmetic revamp. Corrected for several Help buttons not functioning properly.
- \* New location for log files: C:\Program Files\PC Synergy\PostalMate\Log.
- \* UPS WorldShip configuration file no longer locked while PostalMate is running.
- \* Revised warning on Carrier Pack Class Select screen, about dim weight for tubes.
- \* Updated zip codes.
- \* Updated delivery commitments for FedEx Express (including Express Freight) and FedEx Ground (including Home Delivery).
- \* Changed DHL International zones for 12 countries, as per DHL update effective 06/01/05.
- \* DHL@home now available from auxiliary workstations.
- \* DHL@home Standard now uses Express fuel surcharge instead of Ground fuel surcharge, as per DHL rule change. DHL@home Deferred is unchanged.
- \* Corrected for possible lockup of CashMate+ when entering "Notes" on the Mailbox Forwarding screen.
- \* CashMate+ Cash Accounting Report no longer selectable on auxiliary workstations.
- \* Added confirmation message that Excel is required to run the Cash Accounting Report.
- \* Corrected the Window title caption on the Report Specifications screen for the Cash Accounting Report, Time Activity Report, and Ultimate Report.
- \* Removed Net Receipt total "count" from the Method 1 calculation on the Register Activity Report.
- \* Corrected for changes to the home phone number for additional mailnames in the CashMate Mailbox Manager not transferring to the 1583 form when printing it.
- \* Corrected for an account charge (debit or credit) not showing on the X-Report where the account was deleted before the register day was closed that included the charge.
- \* Corrected for possibility of UPS ASO Incentive selection for Level 10 not working properly from the button on PostalMate Settings, on the UPS Setup tab (it worked OK from UPS Quick Rate-Setting Utility).
- \* Corrected for possibility of DHL Ground Commercial not showing on Rate Comparison, where FedEx Ground was disabled from PostalMate Settings, on the Station Settings tab.

- \* 'P.O. Box' warning message no longer displays at Rate Comparison when doing an International shipment after having done a domestic shipment to a P.O. Box zip code.
- \* Alternate Insurance Report now available to users with "Reports" Security Group access (applicable only if Security is enabled).
- \* Corrected for possibility of a date getting included on Address Line 3 for WorldShip packages.
- \* Corrected for possibility of additional free months not posting when adding a new mailbox.
- \* Store Group 3 only: Changing the Store ID/number in PostalMate Settings (Store Group 3 only) now disables electronic uploads in CashMate+; this forces re-enabling which will update the store number to corporate.
- \* Warning message for DHL Excess Limits Fee no longer inappropriately appears for UPS or FedEx Oversize shipments.
- \* Corrected for possibility of Products added in 'Add and duplicate mode' not saving to the database in certain situations.
- \* New server error message: "The server closed the connection before PostalMate received." Occurs when server transaction is incomplete, but local PostalMate transaction is not.
- \* New server error message: "PostalMate timed out before receiving." Occurs when PostalMate has received no server response after 60 seconds.
- \* PostalMate menu items 'Tools > Re-print > Last FedEx Ground Manifest' and 'Tools > Re-Print > Previous FedEx Ground Manifest' no longer have reversed functionality.
- \* Corrected for possibility of being unable to subscribe to FedEx on a new install without closing and re-opening the PostalMate Settings screen after the account number had been entered.
- \* When a Store Group affiliation is added or changed on a master workstation, a warning now appears that the auxiliary stations need to be closed and re-opened for the change to take affect.
- \* Corrected for carrier tier/level setting on Master station not being saved to registry on auxiliary stations (rates were OK).
- \* Corrected for the carrier name displaying incorrectly in Package Details and Package History on an auxiliary station after a new additional carrier and carrier service were added, until PostalMate was re-started.

#### Version 5.3.4

-----

- \* Multiple package shipments now work properly (error introduced in version 5.3.3)

#### Version 5.3.3

-----

- \* Limited support re-introduced for DHL@home services (beta testing began with version 5.1; suspended in Dec. 2004).
- \* DHL@home now requires separate @home account number (limited availability from DHL).
- \* DHL Manifest Detail Report now available from auxiliary workstations.
- \* Unnecessary network update no longer triggered when Endicia/Dazzle settings are changed on master station.
- \* Network update now triggered when rate tier/level is changed on master station.

- \* When security is enabled, users with "Configuration" level access only can no longer change carrier rate tiers (also called 'levels' or 'programs' depending on the carrier) in PostalMate Settings.
- \* When security is enabled, users with "Data Maintenance" level access can now restore backups.
- \* In Shipping Settings, 'Pro Ship defaults' check boxes now always enabled when Pro Ship data entry style is selected.
- \* Corrected for additional carrier services not showing at Rate Comparison after updating from version 5.2 to 5.3.1 or 5.3.2.
- \* Corrected for error accessing PostalMate Settings if a Store ID/number more than 6 digits had been entered.
- \* Corrected for the possibility of the 'cash' tender type not showing on the Close Register Day screen.
- \* Corrected for changes made in Shipping Settings not getting saved in certain situations.
- \* Corrected for additional handling not being included for UPS Express services where length was over 60".
- \* Corrected for the Delivery Area Surcharge portion of a FedEx Ground fuel surcharge getting applied as labor on a StorePack retrieval.
- \* Corrected for UPS Ground Alaska and Hawaii shipments exporting to WorldShip as Next Day Air.
- \* Corrected for count of credit account charges on X-Report including each line item in a sale.
- \* Corrected for possible "Blob has been modified" error in certain cases.
- \* Corrected for shipments not showing on the Void screen where the ship to had been added from the Additional Address Information screen but not added to the database.
- \* When importing Ship To addresses (Store Group 6 only), any tab character contained in the import file, in company, first name, last name, address 1 or address 2 fields, will be replaced with a space.
- \* Corrected for error when trying to set DHL Rate Program after a new install.
- \* Corrected for PostalMate menu item "Edit > Product" being grayed out on auxiliary workstations (CashMate+ menu was OK).
- \* Corrected for mailbox profit margin not calculating for mailbox renewals.
- \* Corrected for possibility of rates not calculating on a Saturday where Saturday pickup charges had been set as blank (setting to zero was OK).
- \* Improved performance on nework auxiliary workstation update after settings were changed on the master.
- \* Corrected for possible index out of date error on auxiliary workstations after a network update.
- \* Updated delivery commitments for DHL Ground.
- \* Added temporary warning for "Excess Limits Fee" when DHL service is selected for package over 130" length + girth; will be removed in future release if DHL resolved billing error.
- \* Corrected for DHL Int'l. rates not coming up for the U.S. virgin Islands.
- \* Enhanced printout of rates and margins at the individual service level for all carriers.
- \* Help button now works properly on Add/Edit Customer screen.

- \* New help files.

#### Version 5.3.2

-----

- \* Corrected for error when making account payment in CashMate+.
- \* Corrected for not being able to set retail rates for DHL Remote Area Surcharge.

#### Version 5.3.1

-----

- \* PostalMate Settings feature added, to consolidate and simplify most setup. Access via Tools > PostalMate Settings (numerous now-obsolete menu items have been removed).
- \* Retail rate-setting for fuel surcharges is now based on adding an additional percentage above the wholesale rate, rather than setting a separate retail percentage that is independent of the wholesale..
- \* DHL domestic and international rates updated for rate change effective for PostalMate users 03/01/05.
- \* Support added for DHL Preferred Provider Program (PPP); from DHL Quick Rate-Setting Utility, or from PostalMate Settings, user can now set wholesale rates by choosing between NPC and PPP.
- \* DHL international zones changed (old Airborne zones have been retired by DHL).
- \* Support added for DHL International WPX to Canada (new zone A), Guam and other U.S. possessions.
- \* Support added for DHL Remote Area Surcharge as an Add-On for DHL International WPX.
- \* Support added for DHL Drop-Offs, for PPP and NPC rate programs; includes DHL Drop-Off Report.
- \* DHL 'Additional Handling' renamed to 'Exception Handling'. This is a \$5.00 surcharge for non-standard container (air and ground), or for length >60" (ground only; formerly it also included air).
- \* Maximum limit for DHL Shipping Value Protection (SVP) increased from \$5,000 to \$50,000; SVP for Ground no longer has a minimum charge (it was previously \$1.40).
- \* DHL 'Additional Handling' term changed to 'Exception Handling'; now applied to Ground only, and only when package exceeds 60" in length (previously it was 48").
- \* DHL Excess Limits Fee no longer used, as DHL rule change now makes it applicable only to packages with a volume exceeding that allowable in PostalMate.
- \* Commercial destinations no longer exempt from DHL Delivery Area Surcharge, as per DHL rule change.
- \* Revised FedEx international zone assignments for Afghanistan, Azores, Madiera Islands and Tahiti.
- \* Store Information can now be edited directly from online FedEx/DHL Subscription/Registration screens.
- \* Replaced three DAZzle/Endicia label layout files to accommodate expanded bar codes used in DAZzle version 4.8.
- \* Users can now unaffiliate from Store Groups 5 and 6.

- \* Visual indicator added to New Shipment screen; provides direct access to PostalMate settings; visible only when store zip code is missing.
- \* Updated zip codes; updated delivery commitments for FedEx Express (including Express Freight); revised DHL ground transit day info for origin 752 to destination 740 zip codes.
- \* LP-2824 (2 x 2-1/4") and LP-2442 (4 x 6") printers added to list of supported Eltron/Zebra label printers.
- \* Added Cash Accounting Report to CashMate+.
- \* USPS Form 1583 from Mailbox Manager now based on December 2004 revision.
- \* When entering existing mailbox accounts, a due date from the prior year can now be selected.
- \* When converting from Trial to Owner version, and user elects to delete transactions, mailbox transactions are included; Customer and Ship To records cannot be deleted unless transactions are also.
- \* UPS EULA no longer required for PostalMate installs/updates.
- \* Help button now works on Auction Settings screen.
- \* Corrected for the possibility of a tracking number overlapping a zip code on the Alternate Insurance Report.
- \* Corrected for departments assigned to mailbox transactions not calculating a profit margin where a wholesale profit % is used for that department.
- \* Corrected for possibility of mailbox not resetting to "current" after a past due date was manually changed.
- \* Corrected for possibility of mailbox disappearing from the edit screen after deleting additional mailnames.
- \* Can no longer add mailbox with a number of "0".
- \* Can no longer begin mailbox transactions (open new, renewals, deposits, etc.) if the register day is closed.
- \* Mailbox deposits are now included on the CashMate+ Register Deposit Report.
- \* Corrected for UPS or FedEx Ground fuel surcharge getting applied as labor when retrieving a StorePack estimate.
- \* Discounts can no longer be applied against any mailbox deposits, which caused errors running the Ultimate Report.
- \* Corrected title on FedEx Tracking screen, it showed UPS. Also, the screen is available now by clicking on "View."
- \* Corrected for the cursor not staying on the selected tab when setting the display of shipping services from the main menu.
- \* Unfulfilled auction items can no longer be voided from the shipment void screen.
- \* Services and rates now clear properly after canceling a an auction fulfillment at Rate Comparison then fulfilling another item without closing the Auction Find screen.
- \* UPS Large Package surcharge now included in summary totals on UPS Manifest Detail Report; separate line item added to report for this surcharge.
- \* Corrected for the possibility of the Carrier Pack screen coming up when fulfilling an auction item.
- \* Corrected for the Intermediate Table Rebuild Utility removing unfulfilled auction items from the ShipmentXnCurrent table.

- \* Corrected for the CashMate+ X-Report Method 1 "Count" of Credit Account Charges including Credit Account Payments.
- \* Corrected for the possibility of Method 2 on the X-Report not including all tender types when closing auxiliary workstations from a master station.
- \* Corrected for the possibility of Method 2 on the X-Report including credit/debit account transaction counts.
- \* Corrected for the possibility of the reconciliation screen not matching the selected tender type when closing the register.
- \* Corrected for the possibility of secondary cash reconciliation screen not being available when closing the register day for multiple workstations at the same time from the master station on a network.
- \* Corrected for the possibility of amounts on the secondary cash reconciliation screen carrying over to another station's screen when closing the register day for multiple workstations at the same time from the master station on a network.
- \* Corrected for Customer Account Activity Report not displaying the Company and/or First and Last name in the header.
- \* Pro Ship screen no longer displays in background during rate calculation when in Wizard Ship mode during the day's first shipment.
- \* Blank Wizard-style Rate Comparison screen no longer displays after canceling a Pro Ship package after rate calculation, then selecting a service and switching to the Wizard Ship Mode.
- \* Corrected for possible access violation where packing materials were deleted from a retrieved StorePack.
- \* Corrected for access violation where the UPS Manifest Detail report was selected from the menu then cancelled.
- \* Corrected for WorldShip transactions not finishing automatically on computers with hyper-threading enabled.
- \* Corrected for Saturday Delivery or Pickup amount not being included in the wholesale rate display on the Package Details screen.
- \* Corrected for the possibility of insurance charges getting inappropriately assigned to the primary instead of alternate provider, under certain unusual scenarios.
- \* Corrected for the possibility of an insurance charge being added to a package transaction, even though no declared value was entered, under certain unusual scenarios.
- \* Corrected for mailbox late fees displaying on mailbox notices that should not have late fees when all notices were printed.
- \* Corrected for not being able to edit fields for user-added carrier service that was set up as a fixed-rate service.
- \* Files and registry keys related to old PostalMate-UPS internal online interface removed, and no longer included in backups.
- \* New Help files.

#### Version 5.2.4

-----

- \* Corrected for error where the update was run against a new install of Version 5.2.
- \* Corrected for network auxiliary station updates if a carrier pickup was not the last one of the day.
- \* Removed network auxiliary updates for USPS or additional carrier pickups.

- \* Corrected for Store Group 3 adjustment uploads failing.

#### Version 5.2.3

-----

- \* UPS air packages less than 1 cubic foot in volume are now candidates for dim weight, as per UPS rule change.
- \* When used with UPS WorldShip 7.0 (new), 'auto complete' feature now works properly.
- \* Corrected for the addition of FedEx Ground insurance charges for the first \$100 of declared value.
- \* Corrected for UPS insurance fees over \$300 not including the first \$100.
- \* Corrected for the FedEx Ground wholesale/retail fuel surcharge percentages being reversed on the surcharge rate-setting screen.
- \* Corrected for UPS Ground Additional Handling charge not being included on Rate Comparison display (it was included on the Package Details screen and in amount actually charged to customer).
- \* Corrected for PS60 scale interface for USB not working.
- \* Corrected for possible server upload failures for Store Group 3.
- \* Updated UPS Suggested Retail rates with newer ones.
- \* Corrected for the possibility of "Method 2" not calculating, and/or an incorrect Open Date, on the X Report in CashMate+.
- \* Appropriate range now used for calculating FedEx 2Day or 3Day Freight rates.

#### Version 5.2.2

-----

- \* Corrected for not being able to change from Pro Ship style data entry to Wizard style and vice-versa.
- \* Corrected for Ship To fields being inappropriately re-populated when a DAZzle/Endicia shipment was transacted, where no first or last name was included in the Ship To record.
- \* Corrected for possible program lockup when attempting to purge Mailbox transactions from System Utilities.
- \* Corrected for a package finishing when trying to enter contents at Package Details screen.
- \* Corrected for network auxiliary workstations not updating delivery dates after a Carrier Pickup on the master station.
- \* Corrected for FedEx Ground Alaska OS3 packages using actual instead of rating weight.
- \* Corrected for "Enter" on the keyboard not advancing from the packing material selection screen when processing a StorePack.
- \* Corrected tab stop order from the UPS surcharge rate setting screen.

#### Version 5.2.1

-----

- \* FedEx Express domestic and international rates updated for rate change effective 01/03/05.
- \* FedEx Ground rates updated for rate change effective 01/03/05; includes new rate structure for insurance.
- \* UPS domestic and international rates updated for rate change effective 01/03/05; includes new rate structure for insurance.
- \* Support added for UPS Oversize 3 and Large Package Surcharge.
- \* Support added for UPS Ground and UPS Standard Canada fuel surcharge.
- \* Support added for FedEx Ground and Home Delivery fuel surcharge.
- \* Support added for use of DHL Express Pack/Pouch, Express Tube, and Express Box, in conjunction with International WPX.
- \* Support added for new USPS Parcel Post Flat-Rate Box.
- \* The file import screen for NuMarkets store groups will now show a warning in network environments against processing transactions on workstations while the import is running.
- \* Removed support for shipping UPS via PostalMate's PLD; WorldShip interface now used exclusively.
- \* UPS Manifest Detail Report now available in conjunction with WorldShip interface.
- \* Added Time Activity report to CashMate+.
- \* Mailbox Next Due Date can now be changed to date in past.
- \* Changing mailbox Next Due Date now password-protected for systems with enabled security (part of Billing & Late Fees group).
- \* Mailbox Term can now be changed at any time.
- \* Register drawer status (Open or Closed) now indicated on CashMate+ X Report.
- \* Updated maximum dimensions for USPS Parcel Post Switzerland.
- \* Insurance no longer available for USPS Parcel Post to Iraq, as per Postal Bulletin 22135.
- \* Revised graphics on Carrier Pack Class Select screen, added warning about dim weight.
- \* FedEx Ground Alaska Rural Surcharge amount now based on rating weight instead of actual weight.
- \* Updated delivery commitments for UPS (air), FedEx (Express) and DHL (air); and Delivery Area Surcharge designations for UPS, FedEx and FedEx Ground.
- \* New Help files.
- \* Corrected for possibility of unintentionally canceling a mailbox transaction if using the main menu.
- \* Corrected view of FedEx Freight Inside Pickup Or Delivery add-on rates (the per pound rate is .412; the screen was only displaying 2 places past the decimal).
- \* Corrected for having to click "OK" twice after adding a new Ship To if the zip code was entered after the address info.
- \* Corrected for mailbox department sales not being included in the Sales Tax Report.

- \* Corrected for being unable to restore CashMate+ from the taskbar where a Ship To record had been "verified" from one of the mailbox screens; the Ship To edit screen now stays on top like it does from the shipping screens.
- \* Corrected for the default data entry style prompt (Pro Ship or Wizard Ship) changing where a package was cancelled at Rate Comparison after changing the default view of rates using the hide/show Pro Ship panel button.
- \* Corrected for being able to delete all users where security was enabled.
- \* Corrected for the possibility of a Ship To name not showing on the CashMate+ receipt where a new Ship To was added during a shipment but not added to the database from the Additional Address Information screen.
- \* Corrected for multiple city selection screen coming up at Rate Comparison when changing from residential to commercial.
- \* Corrected for multi-package shipment total on the Multi-Package Shipment tab at the Package Details screen including all multi-packages for the day (the individual packages and shipment totals were correct).
- \* Corrected for packages from a multi-package shipment going to DAZzle after the selection was made not to use DAZzle on the first package; the Endicia option button is available for each package.
- \* Corrected for possible index error when changing names on service tabs.
- \* Corrected for possibility of DAZzle info message regarding labels, for international services with long service names.
- \* Corrected for incorrect DAZzle label layout for USPS Parcel Post Economy International.
- \* Corrected for the possibility of alternate insurance not being calculated after cancelling a current shipment at the Additional Address Information screen and re-selecting an existing ship to from the database.
- \* Corrected for possible access violation where the "log" button was clicked at the Drop-Off entry screen and all Drop-Off services had been disabled.
- \* Corrected for the possibility of shipping unacceptable dimensions where a StorePack with acceptable dimensions was retrieved and then the acceptable shell removed and replaced with a shell that did not have acceptable dimensions.
- \* Corrected for possible program lockup when fulfilling an auction item.
- \* Corrected for intermittent communication failure with the new Mettler Toledo USB/Serial scale.
- \* Corrected for access violation after selecting an add-on at package details, going "back" to rate comparison then "next" without having made any changes.

#### Version 5.1.9

-----

- \* Corrected for Endicia/DAZZle international shipments including packing material cost in the postage.
- \* Corrected for Endicia/DAZZle international shipments doubling insurance charges.

#### Version 5.1.8

-----

- \* Corrected for not being able to copy failed UPS PLD uploads to diskette.
- \* Copy PLD to diskette no longer limited to destination drive A: or B:

- \* Corrected for the possibility of duplicate services showing at rate comparison.

#### Version 5.1.7

-----

- \* Corrected for possible "closed dataset" error when retrieveing a storepack estimate.
- \* Corrected for possiblity of labor not being included for a shell when processing a storepack estimate.
- \* Corrected for labor still posting where it was zeroed out when processing a storepack estimate.
- \* Corrected for the possiblty of the largest dimensions not posting where multiple shells were selected for a storepack.

#### Version 5.1.6

-----

- \* Corrected for declared value getting imported into Endicia/DAZzle where alternate insurance was being used.
- \* Corrected for error when trying to print a Shipping Transaction Listing.
- \* Corrected for the multiple city selection screen coming up when trying to manually enter the +4 of a zip code.
- \* Corrected for data purge not purging all packages from a multiple package shipment.
- \* Corrected for data purge not purging the previous day from the date selected for purge.
- \* Corrected for Cashmate lockup where Mailbox>Edit>Mailbox was selected then cancelled.
- \* Concatenated company with first/last name on the same line for USPS Express Endicia/DAZzle shipments.

#### Version 5.1.5

-----

- \* DHL@home services now restricted to residential destinations.
- \* DHL@home services now unavilable to "light black" destination zip codes.
- \* Delivery Confirmation now automatically applied for all DHL@home services.
- \* Corrected for declared value imported to Endicia/DAZzle from PostalMate not calculating in the postage.
- \* Corrected for PostalMate allowing up to 999 lbs on Parcel Post shipments.
- \* Corrected for Endicia/DAZzle not accepting Parcel Post shipments over 35lbs and less than or equal to 70lbs.
- \* Corrected for Endicia/DAZzle not calculating the Parcel Post 'oversize' rate for PostalMate transactions. (Note: DAZzle will still not post 'oversize' until Endicia updates their software...scheduled for late in the week of 11/01/04).
- \* Corrected for not being able to reprint labels from Package History for Endicia/DAZzle shipmntnets.
- \* Corrected for Endicia/DAZzle tracking numbers not transferring into Cashmate.

- \* Corrected for Endicia/DAZZle zip +4 and tracking numbers not printing on the Ship Info label.
- \* Corrected for possible 'Cannot focus a disabled or invisible window' message after entering the manual weight entry screen multiple times.

#### Version 5.1.4

-----

- \* Renamed 'Dazzle' features and references to 'Endicia'.
- \* Corrected for help file not being found from product add/edit.
- \* Corrected for DHL @home not calculating OS1 and OS2.
- \* Corrected storepack packing label to include the name of the carrier service.
- \* Dazzle will no longer close after each transaction...this resolves various possible program errors.
- \* Corrected for unnecessary mailname warning when printing notices from individual mailbox accounts.
- \* Corrected for mailnames not showing after selecting MB>Forward Mail>View/Edit and returning to main screen.
- \* Corrected for Endicia label not including a return address where customer was set in PostalMate as the default.
- \* Added hourglass when finish is clicked from the register total screen in Cashmate.
- \* Corrected for shell and filler not importing into Cashmate where a storepack was imported after being retrieved and finished.

#### Version 5.1.3

-----

- \* Ship Info label redesigned.
- \* Updated icons on these screens: Dimension Type; Object Dimensions; Weight-based Rate-Setting.
- \* Added warning to Ship To Phone Number screen advising user to include area code.
- \* DHL@home services now available to commercial destinations as well as residential.
- \* Dazzle settings now apply per workstation rather than globally.
- \* Decimal point buttons added to Discount and COD screens (inadvertently removed in Version 5.0).
- \* Updated UPS Routing Code (URC) data, version 36.0A; new version reflected on UPS labels generated in PostalMate.
- \* Corrected for not being able to finish DHL @home and International retrieved storepacks.
- \* Corrected for zip+4 not showing on USPS Generic Shipper labels.
- \* Corrected for DHL internet shipments failing where the ship to record had +4 on the zip code.
- \* Corrected for possible access violation in a network environment where new ship to records were being added.

- \* Corrected for tracking number prompt not showing if DAZzle was enabled.
- \* Corrected for possible access violation after going back to rate comparison from package details where USPS had been selected and alternate insurance was being used.
- \* Corrected for DAZzle address failed verification message staying behind WorldShip where it is used.

#### Version 5.1.2

-----

- \* The full Zip+4 now appears, when available, on the Package Details screen and on Generic Shipper and Ship Info labels.
- \* Fixed for buttons not working at package details (including "Finish") on DHL International shipments unless on-line shipping was disabled.
- \* Fixed help file not being found from System Check. Also removed the label showing ODBC.ini on the worldShip tab...we do not modify or distribute this system file for our interface.
- \* Corrected DAZzle International label not including Address Line 3.
- \* Corrected for DAZzle address verification failed message going behind Cashmate.
- \* Corrected for DHL International shipments requiring complete address information.
- \* Fixed closed dataset error message when the country "Find" button was clicked from the ship to add screen.
- \* The "Verify" button on the ship to add screen (where Dazzle is being used) is no longer active unless there is at least a city, state, zip to verify.
- \* New Help files (added topics for DAZzle interface and Auction features).

#### Version 5.1.1

-----

- \* Dazzle interface added. Includes online address verification and labels with postage indicia.
- \* DHL @home services added.
- \* DHL international added.
- \* Auction item features added.
- \* Password no longer required to enable Mailbox Manager.
- \* USPS Form 1583 can now be printed for any mailbox (from the Mailbox Edit screen), not just when opening a new mailbox.
- \* USPS Form 1583 from Mailbox Manager now based on April 2004 revision.
- \* Upon mailbox renewal, if mailbox rate for last term is different than current store rate, user can select to auto-fill form with either set of rates.
- \* Closed mailboxes can now be added, when entering existing mailbox accounts in initial setup.
- \* Folder/file for Store Group 4 no longer generated (supported and earlier feature that never went into general release).

- \* Revised Customer Data Export screen in System Utilities.
- \* On Add-On Rates screen, drop-down list of Add-Ons is now wider to avoid truncation of longer names.
- \* Updated zip codes.
- \* Updated delivery commitments for FedEx Express (including Freight), FedEx Ground, and DHL (Air and Ground).
- \* Revised 32 country names.
- \* Corrected position of shipping screen on the first shipment of the day where screen resolution is smaller than 800x600.
- \* Mailbox renewals can no longer be cancelled or voided from the Cashmate register.
- \* Corrected report Shipment/Transaction Listing...discounts were getting taken out twice on the shipment retail total...package retail was ok.
- \* Corrected for being unable to re-add a deleted mailbox in some scenarios.
- \* Corrected for NuMarkets export file not exporting the first record from a newly installed database.
- \* Corrected Mailbox CMRA Quarterly report error on launch and misspelled labels.
- \* Corrected for the Department Sales Report still possibly including some deleted departments.
- \* Corrected for package dimensions not updating where wizard ship was used and dimensions were re-entered after having been already entered once.
- \* Corrected Product Listing report showing incorrect packing material types in some cases.
- \* Corrected for possible wrong customer being selected where a new customer was added from the register and a field for the default search criteria was not populated...the added customer will now have to be re-selected using a valid search.

#### Version 5.0.6

-----

- \* Corrected for possible truncation of date display on New Shipment screen.
- \* Corrected for inability to use a formula to set retail rates for FedEx Express Freight services.
- \* Corrected modem initialization problems with UPS Commissioning and UPS Time-in-Transit functions.
- \* Corrected for possible access violation error when attempting to copy UPS upload to diskette.
- \* Eliminated inappropriate error message about clearing the register tape, when entering an existing mailbox account.
- \* Corrected order of display messages when adding a final existing mailbox, and a customer has not yet been selected.
- \* Corrected selection of forwarding address, when a new address is added to the database.
- \* "Finished" message once again displays after completion of UPS upload; this was removed in an earlier version.
- \* Corrected functionality of finding Product on the Edit Product screen by scanning an SKU.

- \* Corrected for possible "Invalid variant type conversion" error in Mailbox Manager, when going to the Setup and Preferences screen if Departments exist with no description.
- \* Corrected for possible display problem with mailnames in Mailbox Manager, in cases where mailnames have been deleted and new ones added.
- \* Mailbox notices are no longer printed for closed mailboxes, either in batch or for an individual mailbox..
- \* Wordwrap disabled for mailnames displays in Mailbox Manager.
- \* Corrected for possible irregularities in list of mailnames, in certain scenarios where the customer has been changed.
- \* Resetting the Shipment ID (Tools > Options > Shipping Settings, "Other" tab) now works properly.
- \* DHL registration screen now displays appropriate carrier logo.
- \* Corrected informational text on Edit Carrier Service screen, on the "Display" tab.
- \* Added new Store Group (ID 6).
- \* Implemented import and export features (Store Group 6 only).
- \* Revised logo for Store Group 3.
- \* Password is now all lower case for Store Group 4.
- \* New help files.

#### Version 5.0.5

-----

- \* Mailbox Manager can now produce USPS Form 1583 when opening a mailbox.
- \* New CashMate+ help files.
- \* Corrected for Register Transaction History not including all detail information for a mailbox key/service deposit refund or forfeit.
- \* Corrected for the possibility of a mailbox default forwarding fee not automatically showing on Edit Mailbox, "Forwarding" tab.
- \* Corrected access violation when renewing a mailbox that had a late fee included.
- \* Corrected for possible new debit account deposit not posting if added from Edit Mailbox.
- \* "Forfeit Deposit" now works properly.
- \* Corrected mailbox service option descriptions not showing in history where square brackets were used around the description.
- \* Corrected for possibility of retrieved StorePack estimate shipping with a date prior to the current date.
- \* Changed menu item under "File > Carrier Activities > Open Next Shipping Day" from Airborne to DHL.
- \* Corrected for Rural Hawii and Alaska surcharges not being included on the FedEx Manifest Detail Report.

- \* Corrected for wholesale fuel surcharges not being included on any manifest detail reports.
- \* Corrected for weight not automatically populating when retrieving a storepack estimate where a scale is not used.

#### Version 5.0.4

-----

- \* The "Approval" amount for an Alternate Insurance Rate group no longer factors in the "1st \$100" assigned to a primary carrier if used.
- \* Corrected for the possibility of a primary carrier not getting assigned the full \$100 where selected and alternate insurance was used.
- \* Corrected for possible incorrect ship to being selected under certain circumstances.

#### Version 5.0.3

-----

- \* Multiple mailboxes can now be added for the same customer.
- \* When entering existing mailboxes, "Cycle and initial term" controls have been replaced with "Service began" and "Due date" controls; allows due date in the past..
- \* Mailbox History now includes change of Next Due Date from Edit Mailbox screen, and status of account will change if appropriate (next time CashMate is launched).
- \* The default 'Search by' specified in Shipping Settings now also applies when selecting a forwarding address from Edit Mailbox screen.
- \* Corrected for possibility of the "Day" under "Next Due Date" in Mailbox Edit not updating after opening a new mailbox until after "OK" button is clicked.
- \* Corrected for USPS 4x6 Generic Shipper Label printing a comma after the return address line when there was not an Address 2 line.
- \* Corrected for Mailbox History showing all history records until a date range was selected. The default is all records from today's date and back one month will show when opening the screen.
- \* Corrected for "Type" under "Boxholder identification" not showing on the Edit Mailbox screen where a user had typed in an ID type (not selected from drop-down list).
- \* Corrected "Invalid value for field..." error when deleting a service option from an existing mailbox account.
- \* Corrected for a newly added customer not being automatically selected at the Boxholder Information screen when opening a new mailbox account.
- \* Corrected for possible shutdown of program in certain unusual scenario involving: Wizard Ship; StorePack; and change of object or package dimensions.
- \* Alternate Insurance Report will now sort by date.
- \* Revised logo for Store Group 2.

- \* New help files; help for Mailbox Manager implemented.

#### Version 5.0.2

-----

- \* Corrected for DHL 10:30 services not showing for carrier packs.
- \* Where alternate insurance is used, the wholesale amount will now not be included for USPS on the screen or labels.
- \* Corrected for the Alternate Insurance Report using retail rates instead of wholesale.
- \* Corrected for no data on the Alternate Insurance Report after a carrier pickup was done.
- \* Where multiple boxes are selected when doing a storepack, the dims of the largest box are now used for calculating rates.
- \* Corrected for the possibility of the 3rd dimension not recording when adding a new box.
- \* Corrected for the "workstaion" not showing at register transaction history in Cashmate unless it was selected first.
- \* Corrected page number on second page of Shipping Profit Report.
- \* Added page numbers to Alternate Insurance Report.
- \* Corrected for "Ok", "Cancel", and "Help" buttons not showing on "Add Tax Region" screen.
- \* Corrected for possible "User transaction is already in progress" message when trying to edit a sales tax region.
- \* Corrected for possible incorrect rate for Priority Mail from the PO Letter screen.
- \* Corrected Arrival Exception Report not downloading after connecting.
- \* Corrected for possible rates not re-calculating where a previous shipment was cancelled and weight was not removed from the scale for the next shipment.
- \* Added auxiliary workstation update where alternate insurance or service tab settings are changed on a master workstation.
- \* Where alternate insurance is used and the first \$100 is assigned to the primary carrier...the program will now calculate the charge for \$100 or less if the primary carrier charges a fee on the first \$100 (USPS).

#### Version 5.0.1

-----

- \* Alternate Insurance feature added.
- \* Changed Airborne references to DHL; services now have DHL names.
- \* Support added for DHL Next Day 10:30 am services.
- \* Coupon and Discount register functions can now be applied against selected line item, not just the last line item.
- \* Revised user interface; designed for minimum 800 x 600 screen resolution; new graphics and larger controls.
- \* Rate Comparison screen enhancements:

- New status panel (upper right) replaces status bar.
- For Carrier Packs, display of shape is now on rate cell.
- Saturday Pickup and Delivery indicator now on status panel instead of rate cell.
- In Pro Ship mode, eight rate cells now displayed instead of six.
- In Pro Ship mode, residential/commercial selection is via button instead of drop-down list.

\* Insurance rates can now be set by simply entering dollar amount for most providers, rather than by percentage markup or margin.

\* In Shipping Settings, Display of Services tab, selecting or deselecting carrier services can now be done globally by carrier instead of only by individual service.

\* Added number keypad and Clear button to the Ship To Phone Number screen.

\* "More" button on Package Details screen renamed to "Another" (functionality is the same).

\* Updated zip codes.

\* Updated delivery commitments for FedEx Express (including Freight) and DHL (Air and Ground).

\* Updated UPS Routing Code (URC) data, version 33.0A; new version reflected on UPS labels generated in PostalMate.

\* Background color-setting feature added; applies when screen resolution is higher than 800 x 600 and PostalMate is run maximized.

\* CashMate+ menu item "Exit POS" changed to "Exit CashMate+".

\* User can not longer forfeit a Debit Account deposit if a department has not been mapped.

\* Corrected for possibility of shipping a package with no destination city/state/zip.

\* Corrected for CashMate error when single-digit value was entered for coupon or discount without preceding with a zero.

\* Corrected for possibility of Customer "Level" discount not being applied in CashMate when customer was selected in PostalMate and brought over.

\* Corrected for possibility of Customer "Level" discount being extended to following customer in CashMate.

\* Corrected for truncating on shipment arrival time on CashMate receipt ("M" missing on AM or PM).

\* Corrected for "User Defined" field names 2, 3, or 4 not showing on the Edit Customer screen in CashMate.

\* Revisions to Shipment Transaction Listing report.

\* A customer selected in PostalMate for a shipment is now remembered on the "Find customer" screen on the next shipment.

\* A line item % discount or coupon in CashMate can no longer be more than 100% of the value of the item.

\* Updated rules for USPS international services for certain countries, as per Postal Bulletin 22131.

\* Primary insurance no longer allowed for USPS GXG services (Alternate Insurance will be allowed); maximum allowed weight for these services now set to 59 lbs for all countries (USPS allows more for some countries).

\* Implemented Mailbox Manager for beta testing.

\* The "2000" designation is no longer used with "PostalMate," and has been removed in textual and graphical references.

- \* New Help files.

#### Version 4.9.4

-----

- \* Added the user name to CashMate transaction voids in the Events log for security log-ons.
- \* Corrected for "List index out of bounds" message if "OK" is clicked at the security log-on screen when no data is selected/entered.
- \* Corrected for possible user log-on where no password had been assigned to the user.

#### Version 4.9.3

-----

- \* Changes made in Edit Ship To screen now properly appear on Find Ship To screen, when accessed from main menu.
- \* Multiple Place Names screen no longer appears when Edit button is clicked on Find Ship To screen, when selected from main menu in some cases.
- \* Worldship interface now works properly for users that updated from 4.8.1 to 4.9.
- \* Corrected for incorrect description on Register Transaction Activity report where a Debit Account Deposit was forfeited.
- \* Store ID/number in the store information screen now limited to 4 characters for Store Group 3.
- \* Removed message "No adjustment data found for specified date range. Adjustment values and totals will be left blank," when running Unit Sales Report (Store Group 3 only).

#### Version 4.9.2

-----

- \* Corrected for insurance not being allowed on USPS International shipments.
- \* Corrected for program not advancing automatically to the next screen after a new Ship To entry is added.
- \* Corrected for the zip code entry box remaining on the screen after a country is selected for a new Ship To entry.
- \* Edits to Ship To entry on previous shipment now display properly in subsequent shipment.
- \* Deleted departments with no activity once again included in CashMate Department Sales Report; this is temporary until correction can be made for totals not properly aligning with departments (introduced in 4.9.1).

#### Version 4.9.1

-----

- \* Package Transaction Listing report redesigned and renamed Shipment Transaction Listing.
- \* Updated zip codes.

- \* Updated delivery commitments for FedEx Express (including Freight) and Airborne (ground and air).
- \* Updated UPS Routing Code (URC) data, version 30.0A; new version reflected on UPS labels generated in PostalMate.
- \* Support added for new Airborne Ground Oversize 3 classification.
- \* Support added for Airborne Excess Limits Fee (\$50.00 surcharge).
- \* Airborne/DHL insurance carrier now split into two (Ground and Air).
- \* Revised Airborne insurance rules and rates to conform to new DHL requirements
- \* Above revision, in combination with server software change, resolves server error on Airborne packages with declared value.
- \* Support added for ASO Level "PP" (for Store Group 5 only).
- \* Support added for entry and storage of Store ID (for Store Group 3 only).
- \* Cashmate Sales and Profit Reports no longer display numbers for deleted departments with no activity within specified date range.
- \* Weight Override no longer activated, with weight on scale, if the manual weight entry screen was entered twice.
- \* Weight Override now properly clears when a retrieved StorePack estimate with manually entered weight was cancelled.
- \* New Shipment Transaction Listing Report corrects for report only displaying the first package of a multi-package shipment.
- \* Corrected for unnecessary network update when a scale setting was changed on an auxiliary station.
- \* Corrected heading on wholesale rate report for UPS fixed rates; now says "Profit" instead of "Rates."
- \* Added new CashMate+ menu item, File > PA Activities (visible for Store Group 3 only). Access to features restricted to beta sites.
- \* New Help files.

#### Version 4.8.4

-----

- \* USPS Express Mail no longer available to Guam and other Pacific Islands, as per USPS Postal Bulletin Issue 22122. Affects all 969 zip codes, and 96799.
- \* Determination method changed for FedEx Express Delivery Area Surcharge, as per FedEx directive (now per zip code, not RM/PM service area).
- \* Country "Northern Mariana Islands" renamed "Saipan (N Mariana Islands)"; and FedEx Economy to this destination is now supported.
- \* Updated Holiday information.
- \* Corrected for services not offered to some US Possessions or some Hawaii Zip Codes showing with a zero dollar amount and zone.

### Version 4.8.3

-----

- \* Corrected for UPS Commissioning problem (based on version number), introduced in Version 4.8.1.

### Version 4.8.2

-----

- \* WorldShip (WS) Interface: Tracking numbers generated in WorldShip now go into PostalMate history and onto CashMate+ receipt.
- \* WS Interface: Customer name/company now prints on UPS Shipper label from WorldShip, if linked to shipment in PostalMate.
- \* WS Interface: "Track" button on "Matching Packages" screen launches browser to ups.com tracking page for selected package (UPS domestic only).
- \* WS Interface: Disabled Tools > Re-print > Carrier Pickup Label (this is for the UPS Bar Code Summary label, now generated by WorldShip).
- \* WS Interface: Checkbox added to disable auto-processing in WorldShip for a given package (located on Package Details and Shipment Retrieval screens).
- \* WS Interface: UPS Sample Shipper labels can no longer be printed from Label Options screen.
- \* WS Interface: Text added to this screen advising that UPS label setup must be done in WorldShip.
- \* WS Interface: For Next Day Early A.M., user no longer prompted for Earliest Delivery Time (WorldShip cannot import that information).
- \* WS Interface: Revised 'Trial version' screen, that appears when attempting to Finish UPS package, including addition of Help button.
- \* WS Interface: User can no longer switch between interfaces until all UPS packages have been picked up.
- \* WS Interface: Revised export process timing to increase reliability.
- \* WS Interface: Removed message about UPS Shipper labels, for multi-package shipments containing StorePack estimates.
- \* WS Interface: Carrier Pack "Paks" recorded in PostalMate no longer import as regular parcels in WorldShip.
- \* WS Interface: After switching to PostalMate PLD interface, UPS Manifest and High Value reports in PostalMate no longer include packages shipped using WorldShip interface.
- \* Corrected for Oversize indicator not appearing on shipper label after changing dimensions to to qualify for Oversize upon StorePack estimate retrieval.
- \* Corrected for rates not displaying ("N/A") on P.O. Letter screen at 3,6,7 and 11 oz. weights for First Class Mail.
- \* Corrected for Rate Comparison screen in certain cases not correctly sorting by ascending rate.
- \* New Help files.

### Version 4.8.1

- 
- \* Added interface to UPS Online WorldShip.
  - \* Support added for FedEx Ground Rural Surcharges to Alaska/Hawaii (three new surcharges).
  - \* Updated zip codes.
  - \* Updated delivery commitments for FedEx Express (including Freight) and Airborne (ground and air).
  - \* Updated UPS Routing Code (URC) data, version 27.0A, 01/2004; new version reflected on UPS labels generated in PostalMate.
  - \* Main menu item "Help > Contents & Index" is now "Help > PostalMate User's Guide" (or "CashMate+ User's Guide", where appropriate); icon added.
  - \* New Help files.
  - \* Quick Rate-Setting Utilities no longer appear on menu for carriers deactivated by user.
  - \* UPS no longer appears as a choice on the Surcharge rate-setting screen if the user has deactivated UPS.
  - \* Maximum allowable weight for Airborne Letter services and (and FedEx Envelope for non-FASC locations) changed from incorrect 7.99 oz, to correct 8 oz.
  - \* UPS shipments now allowed to Alaska zip codes 99546 and 99629.

#### Version 4.7.1

-----

- \* Airborne rates updated for rate change effective for NPC locations on January 26, 2004.
- \* Airborne Quick Rate-Setting Utility now used only for setting retail rates (using previous margins), and is will now be available only after major rate changes.
- \* Airborne wholesale rates no longer user-editable (only NPC wholesale rates are now supported, and are set by the update).
- \* Removed Airborne rate and rule changes for NPC locations introduced in Version 4.4 (DAS, Saturday Delivery, residential fee; Dim weight divisor), as per Airborne directive.
- \* New icon for Carrier Pack button on Shipping Setting screen, Display of Services tab.
- \* "Commercial" terminology removed from description of UPS Second Day Air AM services in Shipping Settings, on the Display of Services tab (term was added in 4.6).
- \* Refined Transaction Purge functionality (System Utilities, Tools > Purge Transactions): transaction data is now re-indexed and packed during the process.
- \* After restoring a backup, new method is now employed to avoid duplicating UPS tracking numbers; user is no longer advised to re-commission.
- \* Corrected for possibility of H3 and/or residential charges for FedEx Freight being applied twice in some cases.
- \* Corrected for FedEx Standard Overnight to AK/HI appearing on Rate Comparison in certain cases when inappropriate.

- \* Corrected for Oversize rating for FedEx Express not being applied when length is > 108".
- \* Corrected for user-added Arrival Day and Arrival Time text not appearing on Rate Comparison (these are for non time-definite services; editing is from the Edit Carrier Service screen, Display tab.
- \* Corrected for Rate Comparison not updating when weight on scale changed.
- \* StorePack retrieval: Corrected for fuel surcharge being applied to UPS Ground, or not being applied to Airborne, in certain cases.
- \* Corrected rounding error on First Class Mail for certain weights.
- \* Corrected for FedEx Ground surcharge rate-setting screen inappropriately appearing instead of the one for Airborne, when FedEx Ground is set as "not used" carrier.
- \* Corrected for possibility of dim weight rating being indicated on Shipper and Ship Info labels, and in PLD, for UPS Ground packages with certain dimensions and weight. Rating was correct, only the indicator was wrong.
- \* Corrected for error message "Field CarrierServiceRef is not indexed and cannot be modified" after editing shipping rates, then retrieving an estimate or entering a weight on the P.O. Letter screen.
- \* Corrected for possibility of Delivery Area Surcharge not appearing on UPS and FedEx manifests.

#### Version 4.6.2

-----

- \* Corrected for Additional Handling charge being applied instead of Delivery Area Surcharge, for FedEx Home Delivery and Airborne services to applicable residential destinations.
- \* Corrected for display of Airborne Delivery Area Surcharge amounts on rate-setting screen (Edit > Shipping Rates > Surcharges). Display problem on this screen only; post to database is correct.
- \* Corrected for possibility of labor charge getting set to zero during update where it should not.
- \* Corrected for archive of old files after update not including all indexes for Product.db.
- \* Corrected Additional Handling charge for UPS shipments displaying as the FedEx H3 Delivery rate on rate comparison, transaction posted normally.

#### Version 4.6.1

-----

- \* FedEx Express domestic and international rates updated for rate change effective 01/05/04.
- \* FedEx Ground rates updated for rate change effective 01/05/04.
- \* UPS domestic and international rates updated for rate change effective 01/05/04.
- \* Support added for FedEx Ground Commercial and Home Delivery to Alaska and Hawaii.
- \* Support added for new FedEx Express/Ground and UPS Delivery Area Surcharges to applicable commercial destinations.
- \* Support added for new FedEx Delivery Area Surcharge for applicable Alaska destinations.

- \* Support added for new FedEx Ground Oversize III classification, including Oversize Charge (\$30.00 surcharge).
- \* Support added for new FedEx Express Oversize classification, including Oversize Charge (\$30.00 surcharge).
- \* Support added for new UPS Delivery Area Surcharge to applicable commercial destinations.
- \* Fuel Surcharge no longer applied to FedEx Ground or UPS Ground services as per carrier rule changes.
- \* FedEx Express packages less than 1 cubic foot in volume now candidates for dim weight, as per FedEx rule change.
- \* Dim weight formulas now user-editable for all carrier services.
- \* Updated zip codes, including Delivery Area Surcharge designations for UPS and FedEx (Express and Ground).
- \* Updated delivery commitments for: UPS Air and Ground services, FedEx Express Freight; and FedEx Express (for new zips); and Airborne.
- \* Updated UPS international zoning for eight countries; changed max allowable weight from 44 to 66 lbs for USPS Parcel Post to Japan.
- \* Updated UPS international zoning for fourteen countries; expands service for those countries.
- \* Reports > Shipping > Rate Charts added to Reports security group (password protected if security is enabled).
- \* Added new Store Group (ID 5).
- \* New icon for Carrier Pack button on main shipping screens.
- \* Assigned Labor amount for a Product now has a maximum of \$999.99 (previously there was no maximum).
- \* Corrected for possibility of error condition when adding a Product in 'add and duplicate' mode, or when full name contained a "\$" character.
- \* In CashMate+, corrected for "Show all tender types" option not working properly on Master station closing an Auxiliary.
- \* Re-enabled ability to zero interfaced Detecto scale from Everyday Tools screen.
- \* Corrected for Rate Comparison values for FedEx Express Freight not updating in Pro Ship when zip code was re-entered.
- \* Corrected for possibility of Rate Comparison values not updating for StorePack shipment after changing dimensions, when in ProShip mode.
- \* Corrected for possibility of Rate Comparison values not updating for Carrier Pack shipment after selecting new Packaging Class.
- \* Corrected for possible lockup in Rate Comparison, or not displaying of rates, if rates for FedEx Express Freight were edited during same PostalMate session.
- \* Corrected for StorePack shipments having \$0.00 labor charges when labor amount was changed in previous StorePack shipments within current PostalMate session, in cases where pre-assigned labor amount for material exists.
- \* Menu item File > Carrier Activities > Airborne Registration now unavailable to Store Group ID 3 (as it was prior to version 4.2).

## Version 4.5.2

-----

- \* Corrected for possibility of Rate Comparison displaying and allowing transactions for FedEx and/or Airborne services that exceeded maximum dimensional weight (150lbs); actual weight was used rather than dim weight (problem introduced in 4.5.1).
- \* Corrected for not calculating delivery commitments on UPS Ground when Ship To zip code began with 220.
- \* Corrected for not being able to enter a weight manually in Pro Ship when interfaced to Mettler-Toledo PS60 scale.
- \* Can once again zero interfaced Detecto scales from software (feature was disabled in 4.5.1).

## Version 4.5.1

-----

- \* Carrier Service Activity Report added.
- \* For Close Register Day, added check box to show all tender types; color of grid changed when day has been closed (previously silver, now same as buttons).
- \* Updated UPS Routing Code (URC) data, version 24.0A, 10/2003; new version reflected on UPS labels.
- \* Updated USPS Global Express Mail weight/dimension maximums for Finland, Greece and Ireland, as per USPS Postal Bulletin Issue 22109; changed max insurance for Greece.
- \* Updated delivery commitments for: UPS Ground services; FedEx Ground Commercial; FedEx Express services; Airborne Express air services.
- \* Corrected for Customer name (if used) not appearing on FedEx Ground labels.
- \* Corrected for the "Record" button on P.O. Letter screen being inappropriately disabled in some cases, when using international services.
- \* Corrected for some USPS international services not being disqualified in Rate Comparison for exceeding maximum allowable dimensions, in some cases.
- \* Corrected for not being able to save changes in Edit Product screen by pressing Enter key (instead of clicking on OK button).
- \* Corrected for possible posting of incorrect package count after shipping transaction receives error response from carrier server; in some cases may have resulted in PLD problem.
- \* Support added for ASO Level "PA".
- \* For carriers services disqualified for availability due to exceeding weight or dimensional maximums, Rate Comparison now displays these services (with "N/A" in place of rates) in all cases; previously this was inconsistent between services..
- \* For FedEx Ground, Ship To city names longer than 20 characters now truncated before sending to server to avoid error response (server error says 35 characters, this is inaccurate).
- \* For Airborne internet shipments, Contents field in Package Details can now contain previously restricted characters (such as "&"), that caused server response errors.
- \* Corrected for possibility of "Earliest Delivery Time" value for UPS Next Day Early A.M. not being uploaded in PLD in certain cases.

- \* Editing of retail rate for FedEx C.O.D. add-on no longer sets rate for UPS C.O.D. instead.
- \* Corrected for possibility of Package History displaying Add-Ons for a package other than the one being viewed in some cases. Problem was display only, not data.
- \* Corrected for not being able to enter a weight manually in certain cases with StorePack Later packages, and the scale set to none.
- \* Weight display now correctly shows LBS/OZ, instead of LBS only, for PS60 scale when weight override is activated.
- \* Eliminated conflict with PostalTrak program, wherein PostalMate could not be launched on Auxiliary station if PostalTrak was already running.
- \* Intermediate Table Rebuild now correctly sets field type for PackageCurrentXn.SpecialInst from Memo (instead of A64); update ensures correct field type.
- \* Corrected for possible key violation error with Intermediate Table rebuild.
- \* Corrected for Network update not including range-based rate table in certain cases.
- \* Corrected for signature release not printing on FedEx label when it should in some cases.
- \* Changed calculation for posting to data fields ShipmentXn.ShipmentRetail and ShipmentXn.ShipmentWholesale; update re-populates according to new definition. This field was is for future use, so this was benign.

#### Version 4.4.3

-----

- \* Corrected for possible data format error when interfaced to certain variants of Mettler-Toledo PS6L scale.

#### Version 4.4.2

-----

- \* Corrected for FedEx Express Freight wholesale add-on amounts posting in history incorrectly (customer was charged correctly).

#### Version 4.4.1

-----

- \* Support added for FedEx Express Freight (1Day, 2Day and 3Day).
- \* New technology introduced to increase robustness and reliability of internet shipping. (Note: Airborne shippers registered via previous versions must re-register.)
- \* Support added for FedEx Ground Multiweight Report.
- \* Support added for USB connectivity for new Mettler-Toledo PS6L and PS60 scales having USB capability.

- \* New UPS ASO Incentive discounts for Ground Residential and Standard Canada, effective June 2, 2003.
- \* New Airborne rating benefits for NPC locations (DAS, Saturday Delivery, residential fee; Dim weight divisor).
- \* Package Details screen redesigned to accommodate future functionality.
- \* Updated Airborne Ground transit times.
- \* UPS Manifest Detail Report revised to provide more detail on surcharges and Add-Ons.
- \* Rates for UPS and FedEx Extended Area Surcharge can now be edited from Edit > Shipping Rates > Add-Ons (previously it was only from Edit > Carrier).
- \* "Order Supplies Online" feature added (not available for systems affiliated with certain Store Groups).
- \* Can now "roll back" to previous version in most cases if update fails in middle of process.
- \* The "More" button on Package Details is now grayed out if UPS "Returns Plus" Add-On is selected.
- \* Column for 'User Defined' shipping reference on Shipping Transaction Listing report now properly includes data, and heading shows user-assigned term, if any.
- \* Corrected for StorePack retrievals not including packing materials in some cases, after retrieving other estimates with no packing materials (dollar amount were OK).
- \* Corrected for weight not clearing from previous shipment in some cases, when using Wizard Ship and either PS60 or 8213 scale.
- \* Client now triggered to do a server update for Version Capture after running an update.
- \* Updated Zip codes
- \* Updated Airborne Express commitments.
- \* Updated UPS Routing Code (URC) data, version 23.0A, 07/2003; new version reflected on UPS labels.

#### Version 4.3.1

-----

- \* Updated Zip codes
- \* Updated Airborne and FedEx Express commitments.
- \* Updated UPS Routing Code (URC) data, version 22.0A, 04/2003; new version reflected on UPS labels.
- \* Updated USPS Global Express Mail weight/dimension maximums for nine countries, as per USPS Postal Bulletin Issue 22098.
- \* Appended "Republic of" to names of Georgia and Macedonia in country database.
- \* "Stop" button on "Check & Repair All Tables" feature in System Utilities is disabled while in progress, to avoid data corruption.
- \* Historical data can no longer be deleted in the Account Activity History screen in CashMate+.

- \* Corrected for possibility of C.O.D. Add-On not clearing from package transaction when user selects COD on Package Details, then returns to Rate Comparison and selects a different Carrier Service.
- \* User now warned if initiating backup, and PostalMate version in .exe doesn't match registry.
- \* A Statement Group can no longer be deleted if it has one or more open accounts associated with it.
- \* Corrected for "Record Key Deleted" error after editing full name of existing Product.
- \* Updated PostalMate Help file.

#### Version 4.2.2

-----

- \* Increased print speed and darkness for most system labels (introduced in 4.1.5, not implemented in 4.2.1).
- \* Corrected for invalid zip code entered in Pro Ship disallowing valid zip code entry after that.
- \* Corrected for not being able to ship from origin zip code 85929 to destination zip codes beginning with 984.
- \* Corrected for description not being included on new product being added in certain cases, where description was entered on Find Product screen and carried over to Add screen.
- \* Corrected for Declared Value auto-prompt not appearing in certain cases, where other auto-prompts were on and the Enter key was used for navigation.
- \* Corrected for user being inappropriately logged off CashMate+ register in certain cases, after completing transaction where change was due.
- \* Updated CashMate+ Help file.

#### Version 4.2.1

-----

- \* All rate charts for a specified carrier and rate level can now be printed at once (Reports > Shipping > Rate Charts by Carrier).
- \* FASC tier discount structures for FedEx Express and Ground revised for changes effective April 7, 2003.
- \* Support added for Eltron/Zebra LP2824 printer (2" x 2-1/4").
- \* Airborne registration process (for internet shipping) now more automated; accessed through new menu item File > Carrier Activities > Airborne Registration.
- \* Revised algorithm for calculation and storage of FedEx Express, UPS and USPS zones after entering or changing zip code in Store Information screen.
- \* Updated UPS zoning info for Nevis and St. Kitts; and USPS weight/insurance maximums for Norway and Germany (insurance no longer available).
- \* Updated transit day data for Airborne Ground and FedEx Ground and UPS Ground.
- \* UPS Time-In-Transit online inquiry expanded to include new zip codes ranges such as 398.

- \* Updated zip code data base to include revised air commitments and Delivery Area Surcharge destinations.
- \* Ultimate Report no longer includes departments that have been deleted and have no activity within the specified date range.
- \* Corrected for customer not getting linked to CashMate+ transaction if added or edited during that transaction.
- \* Package ID on CashMate+ receipts no longer truncates if more than 8 digits.
- \* Corrected for possible lockup of CashMate+ after scanning in multiple products on transaction containing a shipment.
- \* Update eliminated extraneous index file, if present, for CashRegisterTotalXnHold table.
- \* Package history data and display now properly handle scenario where an incomplete internet transaction is voided in PostalMate but not online with the carrier. This also eliminates an inappropriate notification message when launching PostalMate.
- \* In CashMate+, where a customer has multiple accounts to select from, accounts are now sorted alphabetically instead of by an internal ID (Edit Customer and Select Account screens).
- \* The 'Validate Shipment References' feature in System Utilities will now remove any package records that do not have a corresponding shipment, and any shipment records that do not have a corresponding package
- \* Warning message now appears if user attempts to close CashMate+ with transaction in progress; user must complete transaction prior to exiting.
- \* Update corrects stored wholesale rates for UPS Extended Area Surcharge Add-On, for cases where fuel surcharge utility had been used prior to version 4.1 (fuel surcharge was inappropriately applied to these rates).
- \* Corrected for not being able to tab out of user selection box on CashMate + register screen box in certain cases.
- \* Corrected for Customer Levels 2 and 3 discounts not being applied to product sales in some cases.
- \* Corrected for Additional Handling not properly clearing from Rate Comparison, for UPS International shipment in certain cases after changing dimensions.
- \* Can no longer delete a Sales Tax Region, Agency or Category if assigned to any Department or Product; default tax region cannot be deleted under any circumstances.
- \* Corrected behavior of certain buttons in Carrier Pack shipments: "Back"; "Next"; "Cancel" and "Parcel".
- \* Reduced for possibility of multiple successive iterations of rate calculation resulting from holding Enter key down or clicking "Next" repeatedly on screens preceding Rate Comparison; Next button disabled in such cases.
- \* For FedEx internet shipments, if the first digit of the Ship To phone number is a "1" it's removed before the transaction is sent to the server. This is to reduce errors from FedEx.
- \* Corrected for possibility of dimensions not posting in for a newly-added packing material not posting with a StorePack transaction in certain cases.
- \* In System Utilities, table rebuild feature (Tools > Table Utilities > Check & Repair All Tables) no longer runs automatically from menu item; user now initiates by clicking "Start" after dialog appears.
- \* Updated Help files.

#### Version 4.1.5

-----

- \* Increased print speed and darkness for most system labels.
- \* Corrected problem of not being able to print sample UPS Shipper labels (Tools > System Settings > Labels).

#### Version 4.1.4

-----

- \* Corrected for inappropriate refreshing ("flicker") of Rate Comparison display, caused by recalculation of fuel surcharges after changing weight on scale.

#### Version 4.1.3

-----

- \* Corrected for fuel surcharge amount being inappropriately allocated to Labor instead of Shipping on a StorePack estimate retrieval.
- \* Corrected for fuel surcharges not being included when rates recalculated on Rate Comparison screen after changing weight on scale.
- \* Corrected for Shipping Profit Report including amounts only from the first package of a multi-package shipment.
- \* Rate Comparison now correctly displays "N/A" for services unavailable due to exceeding maximum size or destination APO/FPO zip code (was displaying five-digit dollar amount if fuel surcharge was applied).
- \* X-Report now correctly shows totals for "Calculation of Net Receipts - Method 2" when printed after Close button clicked. Affected Master station only.
- \* Improved reliability of process to resolve incomplete internet shipments, which is triggered when launching PostalMate if any such shipments are detected.

#### Version 4.1.2

-----

- \* Corrected for UPS Bar Code Summary (pickup) label not including package count in the bar code.
- \* Corrected for Rate Comparison not including a Delivery Area Surcharge for certain Airborne zip codes where it should (bold black with \*).
- \* Updated Airborne Ground day commitments.
- \* Corrected for error message on Find Customer dialog screen in certain cases when after adding or editing customer (PostalMate only). Problem introduced in 4.1.1 when fixing display of flagged customers, so that fix was rolled back for now.

#### Version 4.1.1

-----

- \* UPS domestic and international rates updated for rate change effective 01/06/03.
- \* FedEx Express domestic and international rates updated for rate change effective 01/06/03.
- \* FedEx Ground rates updated for rate change effective 01/06/03.
- \* UPS Suggested Retail rates can be applied to all UPS services globally, using the UPS Quick Rate-Setting Utility.
- \* Fuel surcharge functionality enhanced:
  - Percentages now applied dynamically at time of Rate Comparison (no longer part of stored rates).
  - For UPS and FedEx Ground, fuel surcharge now applied to Delivery Area Surcharge, and Saturday Delivery/Pickup portion of charges.
  - Fuel Surcharge percentages are now set in Edit > Shipping Rates > Surcharges (Fuel Surcharge Utility eliminated).
  - No longer required to "back out" old surcharge percentage before entering a new one.
- \* Dim weight now applicable to FedEx international services under 1 cubic foot in volume, as per FedEx directive.
- \* Added Product Sales Report to CashMate+ (Reports > Register > Sales > Product).
- \* Multi-package ID label now contains tracking number (if any) and user-defined package ref (if any).
- \* In System Settings, changed names of "Customer Receipt" and "Store Receipt" labels to "Customer Copy" and "Store Copy," respectively.
- \* As per FedEx directive, effective 01/06/03, minimum rate for FedEx Ground Commercial changed from \$3.23 to \$3.39, and on Home Delivery from \$4.33 to \$4.54.
- \* For an incomplete Airborne internet package transaction, a failed recovery attempt upon re-launching PostalMate no longer automatically voids shipment; user is advised to void. FedEx already worked this way.
- \* Incorporated new data from FedEx Ground to add proper zoning support for stores located in zip codes beginning with 398.
- \* Updated zip code data base to include revised air commitments and UPS Delivery Area Surcharge destinations.
- \* Added capability for manually overriding preset retail price on product when doing a Return in CashMate+ register.
- \* Cursor in edit box now positioned after last-entered character (instead of at beginning) when using on-screen keypad, for Find Ship To and Find Customer screens in PostalMate.
- \* Decimal point '.' button added to on-screen keypad for Find Product screen (replaces '<' button in numeric area).
- \* In CashMate+ register with security enabled and password required, corrected for inappropriate log-on prompt after user is already logged on.
- \* When logging on in CashMate+ by entering first letter of user name in drop-down list, no longer creates line item for Product/Department with matching shortcut key.
- \* Default search criterion for Find Ship To now resets properly after changing it for previous transaction.
- \* Customer no longer inappropriately remains selected for next shipment when Customer auto-prompt is enabled.
- \* Customer no longer unlinked from register transaction when credit limit override is cancelled and another tender type chosen.

- \* On Find Customer screen, customer for name of customer for whom flagging has just been enabled not appearing in red text without having to re-select in some cases.
- \* Can no longer print a UPS Manifest Detail report for shipments that have not yet been picked up (resulted in potential inaccuracies).
- \* Can no longer assign a new Statement Group to a credit account if there are transactions for that account that have not yet been on a statement.
- \* Can no longer apply a discount or coupon amount against a Memo line entry in CashMate+.
- \* "Checking Connection" screen no longer appears in front of warning message when attempting to retrieve StorePack Estimate with no printer assigned for labels.
- \* When viewing weight-based services in Edit > Shipping Rates, corrected for inappropriate changing of "view" selection when changing to a different carrier service.
- \* Setting retail rates for UPS Worldwide Express using UPS Suggested Retail formula now works correctly.
- \* When refunding a debit account deposit or credit account credit, amount entered now correctly matches on register screen.
- \* On Package Details screen, cursor is now in "Contents field" by default (inadvertently changed in version 4.0).
- \* Corrected for allowing Register Day to be closed on Master station before auxiliaries in some scenarios (should never be possible).
- \* Corrected for unnecessary network updates initiating in certain cases, i.e., after changing default search criteria in Shipping Settings.
- \* Access violation no longer results when attempting to re-print label from Everyday Tools for package that was StorePack retrieval.
- \* Intermediate Table Rebuild in System Utilities no longer inappropriately causes data type change relating for actual weight in shipment historyl.
- \* Transaction Void added to Events log.
- \* For Products with no Level 2 or Level 3 retail prices, customers with Level 2 or 3 discounts will get the regular (Level 1) pricing in CashMate instead of \$0.00.
- \* On-screen keypad "00" button now works as designed on CashMate text entry dialog screen, used for check number prompt and other.
- \* Corrected for 2 x 2 Customer label inappropriately displaying "Sales Tax" text in certain conditions using LP2022 printer.
- \* Corrected for rating weight in database not updating if different than estimated rating weight, in certain cases, after retrieveing StorePack Estimate.
- \* Updated Help files.

#### Version 4.0.2

-----

- \* For multi-package shipments with one or more StorePack Later packages, shipper labels don't print until all StorePacks are retrieved, and package count on UPS shipper labels corrected.

- \* UPS Shipper label for StorePack retrieval now correctly shows actual weight rather than estimated weight; same for ShipmentActualWeight value in PLD.
- \* Value of shipment actual weight to next whole pound in ShipmentXN table no longer inappropriately rounded down on shipments recorded after intermediate table rebuild in System Utilities (not visible in application, package weights were OK).
- \* Inappropriate error message no longer results when opening a debit new account, then canceling a 'deposit collected' at the Register Total screen.

#### Version 4.0.1

-----

- \* Rate Comparison now displays arrival commitments for: FedEx Ground; FedEx Home Delivery; and Airborne Ground.
- \* "Multi-package shipping" now supported: for multiple packages with same Ship To and service, Ship To and service are only selected once, New Shipment screen is skipped.
- \* For multiple packages for the same Customer, Customer needs to be selected only once.
- \* Package Details screen redesigned: new tabbed page added, visible only when package is part of multi-package shipment.
- \* New label added: Multi-package ID, to assist in matching shipper labels to corresponding packages.
- \* UPS Suggested Retail Rates added; can be used as retail rates for UPS and other carriers' services that have similar zone structures.
- \* Term used for packing labor on screens, labels, reports and receipt can now be defined by user, in Tools > Shipping Settings, "Other" tab.
- \* Automatic city/state lookup for zip codes added to Edit Customer screen.
- \* Rate Comparison for Carrier Packs now offers "FedEx Envelope" option for 2Day, Express Saver and Economy International services.
- \* New secondary sorting for Find Ship To screen:
  - When searching by zip code, secondary sorting is by last name
  - When searching by last name, additional sorting is by first name, then zip code
  - When searching by company, secondary sorting is by zip code
  - When searching by country, secondary sorting is by last name.
- \* New secondary sorting for Find Customer screen:
  - When searching by last name, additional sorting is by first name, then zip code
  - When searching by company, secondary sorting is by zip code
- \* Sales Report renamed to Department Sales Report; user now warned if specifying date range that includes a partial week while also specifying subtotalling by week.
- \* CashMate+ register receipt reformatted to accommodate multi-package shipments; disallows attempts to void discounts entered in Package Details.
- \* Legacy register interface for CashMate+ removed.

- \* 18 new Department/Product buttons and 10 new register function buttons added to CashMate+ register (on two new tabs).
- \* PageDown and PageUp keys can now be used to navigate between the four Department/Product tabs.
- \* Shortcut keys can now be assigned for register functions and tender types in standard interface (Tools > Options > Register Settings).
- \* Shortcut keys for Products and Departments can be assigned at Tools > Options > Register Settings.
- \* Package History screen, Additional Info tab, now displays status and server information for internet packages.
- \* Corrected for intermittent failure of shipments to "auto-recall" into CashMate+, which would require a manual Recall; also, process is now faster.
- \* Enhancements to Ship Info label: Added Shipment ID and contents; accommodates longer carriers service names; abbreviations changed to full text where practical.
- \* Enhancements to Packing (StorePack Estimate) label: Added Shipment ID, Carrier Service, and Contents; number of labels displayed only if more than one; layout revisions; sample now available in Label Settings.
- \* UPS Manifest Detail report redesigned:
  - Accommodates multi-package shipments.
  - Uses actual wholesale rates (i.e., ASO rates) for displayed charges rather than published rates.
  - Format updated to more closely match latest UPS modifications.
  - Note: Any hundredweight rating that may appear on UPS bill is NOT included in this report.
- \* Header style on Arrival Exception Report now conforms to other reports.
- \* Performance improvement on entering Edit Customer screen.
- \* Extended Area Surcharge now available as an Add-On for FedEx Priority Canada Envelope.
- \* In Add/Edit Department, "Wholesale cost" area, new display shows corresponding percentage of retail amount for entered wholesale profit percentage; wording changed; maximum allowable entered value now 99%.
- \* Department Mapping Report added to System Utilities (Repots > Other > Department Mapping); also available by clicking Report button on Map Departments screen.
- \* Can no longer re-print UPS Shipper Label after package has been picked up; can no longer record UPS domestic packages with the UPS Shipper Label disabled.
- \* Can no longer do a line item void of an Account Payment; register transaction must be cancelled.
- \* "Account" tender type button on Register Total screen now disabled when recalling and Account Payment transaction (consistent with non-recalled transaction)..
- \* Wholesale rate corrected for USPS Return Receipt International (Add-On).
- \* No longer have option of deleting added Departments and Products when converting from trial to registered version.
- \* Updated Holiday information.
- \* Updated zip code database, including latest UPS Routing Code (URC) data, version 20.0A, 10/2002; new version reflected on UPS labels.

- \* Help buttons activated for following screens: Sales Tax Override; Product SKU; Recall; and Text Entry (Memo and Paid Out).
- \* Removed PLDLog.txt file (no longer used by Support).
- \* Corrected for inappropriate inclusion of voided packages in some cases on Package Transaction Listing report.
- \* Register Activity report now shows PostalMate version instead of CashMate+ version, to conform to other reports system-wide.
- \* Format of records in Find Customer screen now consistent between PostalMate and CashMate+.
- \* User can no longer add a carrier service with a maximum weight of more than 999 pounds.
- \* When selecting a "flagged" customer on the Find Customer screen then scrolling down list, no longer displays flagging information that applies to selected customer.
- \* Corrected for selected customer on the Find Customer screen not being highlighted (white) in some cases.
- \* Corrected for Total screen on CashMate+ register inappropriately appearing when Enter key is pressed at a certain point in the log-on process.
- \* Corrected for Ultimate report not including amounts for last shipping transaction for the specified customer in some cases; profits now calculated same as in Profit Report.
- \* Corrected for incorrect posting of wholesale amount for a return in some cases.
- \* Wholesale amounts on 'soft' sales in CashMate+ now post correctly (beginning in version 3.6, profit amounts were recorded as wholesale amounts); affects Profit and Ultimate Reports.
- \* Changes to Profit report in CashMate+: (Note--the line above documents posting changes which also affect this report.)
  - 'Soft' sales now reported ONLY for 'department only' sales (no product, no shipment).
  - Product sales with wholesale cost of \$0.00 (in Add/Edit Product) now reported as 'hard' sales with 100% profit -- no longer 'soft' sales using calculated wholesale cost from department.
  - 'Soft' totals now display "N/A" for Wholesale, Gross Profit and Margin columns for departments with a wholesale cost percentage of 0, 100 or blank at time of sale.
  - Above rule about display of "N/A" will be applied for ALL 'soft' sales within a department if one or more individual sales within the date range qualify for "N/A" (this maintains integrity of figures).
  - Discount and Coupon lines in transactions no longer included in Count column.
  - Grand totals at bottom of report now include Combined, in addition to Hard and Soft.
- \* Ultimate Report now matches combined totals in Profit Report and applies same rules for display of "N/A."
- \* Corrected for Register Deposit report displaying of "Unknown data type."
- \* Corrected for Sales report (Now the Department Sales report) not including the last day of the month in certain cases.
- \* Corrected for process of generating statements failing in rare cases (record in CashRegisterTotalIXN with numeric-only GUID).
- \* Corrected for FedEx Ground Quick Rate-Setting Utility inappropriately applying FASC discount to residential surcharge portion of Home Delivery rates when setting wholesale rates (introduced in version 3.4)
- \* Corrected for secure areas being inaccessible for user's with blank in first name field.

- \* Corrected for account payments not posting to history in some cases (i.e., transaction on Hold, customer re-selected using button on CashMate+ register.).
- \* Corrected for certain Add-Ons not being included on the Customer label.
- \* Register Transaction Activity report now properly lists amounts as negative when appropriate (i.e., discounts).
- \* Date field on Charge Account report no longer overlaps amount field with certain date/dollar combinations.
- \* Updated Help files.
- \* Revised PostalMate and UPS End User License Agreements distributed.

#### Version 3.8.2

-----

- \* Corrected for error possible conditions when posting CashMate+ transactions, due to conflicts with other installed programs.
- \* FedEx Ground no longer inappropriately appears as choice in drop-down carrier list in rate-setting for fixed-rate services.

#### Version 3.8.1

-----

- \* Display of Saturday Pickup options in Rate Comparison is now user-controlled(Edit > Shipping Carrier > "Display Saturday Pickup"). Applies to UPS, FedEx, FedEx Ground and Airborne.
- \* Arrival Exception Report now includes UPS Ground - Residential.
- \* Shipping carriers can now be made "inactive" (Edit > Shipping Carrier > "This carrier not used.") When checked, the carrier will not display in Rate Comparison and in some other program areas.
- \* Allowable maximum filler quantity in StorePack raised from 99 to 9999.
- \* Implemented revised USPS domestic zoning determinations, which became effective July 1, 2002. Affects zoning for some 3-digit zip code origins to some 3-digit zip code destinations.
- \* Implemented revised FedEx Express region determinations to match USPS change (FedEx regions are supposed to match USPS zones).
- \* New zip/city combinations added to database (3,193); obsolete zip codes removed (25); zip code types revised (38).
- \* Support for expansion of UPS Early A.M. services to approximately 600 additional zip codes.
- \* Updated zip code data base with latest UPS Routing Code (URC) data, version 19.0A, 07/2002; new version reflected on UPS labels.
- \* Customer "flagging" feature introduced. (Edit Customer > Notes tab); "Notes" field from Details tab moved to new Notes tab.
- \* System can now store credit card type, number and expiration date (Edit Customer > Details tab); Credit account statements will reflect credit card billing if this option is selected.

- \* Checkbox for "Article will not be encased in standard container" on Package Dimensions screen replaced by button to increase visibility.
- \* Updated maximum allowable length, and length + girth combined, for USPS international Parcel Post and Express Mail services; affects 24 countries.
- \* Register deposit balance on Edit Customer screen is now viewable at all times, regardless of tab selected.
- \* As per FedEx directive, effective 08/01/02, minimum rate for FedEx Ground changed from \$3.11 to \$3.23; minimum rates eliminated for FedEx international services.
- \* Setting wholesale rates for any carrier with Quick Rate-Setting Utility now blanks out "old" previous fuel surcharge percentages in registry, so that if fuel surcharge is re-applied, program won't attempt to back out old percentage.
- \* Performance improvements: Going to Edit Carrier screen; Display of services after selecting carrier in rate-setting screens for Weight-Based and Fixed-Rate services.
- \* Airborne Quick Rate-Setting Utility now properly factors in residential surcharge when calculating wholesale rates.
- \* Minimum declared value charge of \$2.50 for Airborne Ground has been removed; charges for declared value of more than \$501 for Airborne Ground/Express no longer exclude first 50 cents.
- \* Can no longer include shipment in a Carrier Pickup that is on Hold in CashMate+; user must either complete CashMate+ transaction or exclude shipment from pickup.
- \* Calculation of wholesale shipping charges no longer include any "percentage off retail" value for a shipping service's assigned department (as specified in Edit > Department).
- \* Customer ID now only displays at top of Find and Edit screens if search criterion was Customer ID. This reverses change introduced in version 3.7.
- \* X-Report now displays transaction count, instead of item count, for credit account transactions in "Cred Acct Charges" field.
- \* Two obsolete diagnostic reports removed from System Utilities: Reports > User > Product and Reports > User > Sales Tax.
- \* Customer data export file no longer contains "OldDOSID" field (which is no longer in the customer database); "BillTo" field now includes definition of numerical value (i.e., "3: CREDIT CARD").
- \* FedEx SSP Version Capture feature implemented as per FedEx corporate directive, to provide FedEx with technical information about systems utilizing internet shipping.
- \* For Airborne internet shipments, company name is now sent (if present) for residential destinations as well as for commercial, and will appear on label.
- \* FedEx internet shipments of less than .1 pound will no longer result in error condition from FedEx server.
- \* PostalMate-DOS conversion program (in System Utilities) removed, in conjunction with changes to customer database.
- \* Corrected for Generic Shipper label not printing quantity specified in System Settings, for quantities greater than one.
- \* Services for user-added carriers, with a packaging class of Letter, Pak, Tube, and with a 'single fixed rate' structure, no longer inappropriately display in Rate Comparison as regular parcels (non-carrier pack).
- \* These reports now include data from specified "To" date, to be consistent with other reports: Arrival Exception; Sales; Customer Activity.

- \* Corrected for possible incorrect values on PA+ report for "Received on Account."
- \* Register Activity Report (CashMate+) now indicates the "Closed" date rather than the "Opened" date.
- \* Reduced possibility for StorePack materials not coming over to CashMate+ register transaction.
- \* Corrected for possible incorrect tax calculation in CashMate+ for shipment with declared value.
- \* Register Transaction Activity Report now displays customer in header when report is generated from Edit Customer screen.
- \* Corrected for possible out-of-balance condition when closing the Register Day in CashMate+, when shipping transactions with declared value have been voided.
- \* Account statements no longer inappropriately print in landscape format when statements are run directly after printing Charge Account report.
- \* USPS label now properly uses store for return address when no customer is linked to shipment.
- \* Added clarifying information to captions for address lines on Edit ShipTo screen: Line 1 now includes "(primary)" and line 2 includes "(i.e., suite, apt, room floor)."
- \* Table rebuild utility in System Utilities now clears previous log file if that option is selected prior to the rebuild.
- \* When Finish button is clicked in Package Details, it is now disabled and the cursor changes to an hourglass until process is complete.
- \* Internet shipments now send workstation information (PostalMate version, operating system, workstation ID) to server for diagnostic purposes.
- \* "Debit Deposit Out" calculation on X-Report and on Register Closing screen corrected for returns against debit accounts, when multiple tax regions are used.
- \* Obsolete diagnostic file 'connect.txt' no longer stored or maintained.
- \* Operating system and version now display in System Check for when operating system in Windows XP.
- \* USPS Quick Rate-Setting Utility deactivated until next rate change.
- \* Help Files updated.

#### Version 3.7.2

-----

- \* Insurance rate calculation corrected for USPS domestic Express services, for declared values up to \$500.
- \* Airborne Quick Rate-Setting Utility now factors minimum rate when calculating wholesale rates.

#### Version 3.7.1

-----

- \* USPS domestic rates updated for overall rate change effective 06/30/02.
- \* USPS international rates updated for: Register Mail and Canada Parcel Post, effective 06/30/02.

- \* USPS Quick Rate-Setting Utility reactivated and updated to manage retail rates for this rate change.
- \* Added support for Airborne Ground.
- \* FedEx First Overnight availability extended to 1,000+ new zip/city destinations, as per FedEx change effective 07/01/02; updated commitment info to same destinations for other FedEx services.
- \* Added support for country of St. Kitts; added support for UPS Express to country of Nevis.
- \* Updated zones, and dimensional, weight, and insurance regulations, per country for USPS, UPS and FedEx international; added country of St. Kitts.
- \* Updated Holiday information in database for FedEx Express and Ground.
- \* FedEx Tube and FedEx Box shipments now have max weight limit of 20 lbs, as per FedEx Service Guide.
- \* Retail rate for USPS Registered Insured (Add-On) can now be directly edited.
- \* Reverse Payment feature for credit accounts has been re-implemented (Edit Customer, "Accounts" tab).
- \* Register Transaction History can now be viewed by register (workstation); Register Transaction Activity Report will include only that register if printed from that screen.
- \* Register Transaction Activity Report column heading "How" changed to "Tender."
- \* Terminology changes in CashMate on Close Register Day screen: "Recvd on acct" is now "Credit acct payments; "Deposits in" is now "Debit acct deposits;" "Deposits out" is now "Debit account sales;" "Account charges" is now "Credit acct charges;" order changed.
- \* "Register deposits" added to Close Register Day screen (broken out from Debit deposits).
- \* Terminology changes in CashMate+ X-Report and Register Activity report, corresponding to those on the Close Register Day as listed above; lines for "Fwd" "Key" and "Auto" deposits removed (these were unused); lines in different order.
- \* Register function button "Deposit" renamed to "RegDeposit."
- \* For the FedEx Home Delivery "Date Certain Delivery" Add-On, a date earlier than 6 days in the future can no longer be selected, as per FedEx rules.
- \* If user log-in is required (Register Settings), voiding a CashMate+ transaction from Register Transaction History screen now requires user to be logged on.
- \* Cancel amounts and counts for CashMate+ now included discounts/coupons.
- \* Default location for ARS.TXT file for UPS ARS/ASD Collection Report (Drop-Off) changed from "c:\My Documents" to "c:\", to accommodate Windows XP.
- \* In System Utilities, the log file for rebuilding tables now clears and populates properly.
- \* \*VOID\* now appears in account history for debit account payment transactions.
- \* Voiding of refund credit transaction for credit account now posts correct amount, and adds \*VOID\* in account history.
- \* Voiding of debit account payment or register deposit transaction now resets balance properly.

- \* Customer ID now displays at top of Edit Customer screen in CashMate, and Find Customer screen in PostalMate, when search criteria is Last Name
- \* Corrected for possible reporting discrepancies for Ground shipments and for Valid Shipment Count in the FedEx Manifest Detail Report.
- \* CashMate+'s Profit Report now factors in wholesale amounts for Add-Ons brought over from shipments.
- \* Corrected for menu item "Enable Airborne Internet Shipments" not being visible on auxiliary stations.
- \* Help button on Register Day Summary screen activated.
- \* Option to set retail rates (which was non-functional) no longer appears when tier is changed using FedEx and FedEx Ground Quick Rate-Setting Utilities.
- \* Discount data corrected for fixed rate services -- version 3.6 included discounts only for Airborne (affected users who used quick rate-setting utilities to set wholesale rates for UPS, FedEx or FedEx Ground in 3.6 only).
- \* Help files updated (incl. changes made in ver 3.6 -- updated Help files for that version were not distributed in the 3.6 update).
- \* Corrected for possible percentage miscalculation on Fuel Surcharge Utility; also, if no value(s) are entered, value(s) of 0.00 are stored.

#### Version 3.6.1

-----

- \* Added Airborne Express as a fully-supported carrier, including internet shipping for participating stores.
- \* Added FedEx Manifest Detail Report (covers both Express and Ground) and Airborne Manifest Detail Report.
- \* Added Debit Account Statement; available on ad hoc basis from Edit Customer screen, "Accounts" tab.
- \* Description of Package contents can now be entered on Package Details screen and viewed in History; optionally appears on CashMate receipt.
- \* Charge Account Report enhanced: Can now sort by Customer ID or Statement Group; changed to landscape format; Statement Group column added; Auto Charge column removed; Total Current Balance and Total Amount Due added at end.
- \* Purge Transaction feature (in System Utilities) now allows separate selection for purging of shipments and/or CashMate+ transactions; backup warning added; real-time record count added; corrected for problems with purging old shipments converted from PM-DOS.
- \* Quick Rate-Setting Utilities now accessed from PostalMate instead of System Utilities (Edit > Shipping Rates > Special Rate Utilities); Airborne added.
- \* Fuel surcharge utilities for different carriers consolidated into a single one for all carriers and is now accessed from PostalMate instead of System Utilities; Airborne added.
- \* Fuel surcharge utility now 'remembers' the previous percentages (beginning with percentages entered in this version), so it will no longer be necessary to back out the old surcharge prior to applying a new one.
- \* Item voids now remain on receipt, indicated by \*\*VOID\*\* preceding description, and an amount of \$0.00; corrected for possibility of item void not working properly if transaction included shipments.

- \* UPS services now display in rate comparison even when commitment information for destination is unknown; time of day display will read "[Verify with carrier]". Now consistent with FedEx and Airborne.
- \* Can no longer enter double-quote characters in the Last Name or Company fields on the Find Ship To screen.
- \* For UPS packages subject to Additional Handling charges due to being in a non-standard container, PostalMate no longer exempts for being less than 10 pounds (the exemption rule is rarely applied by UPS).
- \* Increased maximum allowable number of credit and/or debit accounts per customer from 11 to 50.
- \* Corrected for Delivery Area Surcharge amounts in some cases appearing on UPS manifest report for shipments that were not actually assessed this charge.
- \* Corrected for incorrect wholesale amount not posting in CashMate+ sales in departments for which the wholesale is calculated as a percentage discount from retail. This affected profit reporting.
- \* Corrected for a CashMate+ transaction with no customer linked getting assigned to a customer (for whom a debit account was opened in the previous transaction with a deposit amount of \$0.00).
- \* First launch after update changes amounts in data converted from PM-DOS from negative to positive for discounts, coupons, returns and paid outs; this corrects sales and profit reporting for those transactions.
- \* First launch after update "undeletes" customers with: a.) open accounts; or b.) closed accounts with non-zero balances. This will allow editing to resolve these conditions.
- \* First launch after update re-opens credit and debit accounts that were closed despite having a non-zero balance. This will allow editing to resolve this conditions.
- \* For any customer with a register deposit balance of less than zero, first launch after update sets to zero.
- \* Update renames user-added "Airborne" user-added additional carriers/services to distinguish from new system-supported iterations: User-added names are appended with "user-added," or surrounded by brackets [], depending on the situation.
- \* Can no longer delete a customer with a non-zero register deposit balance.
- \* Refunding a debit account deposit no longer results in a corresponding adjustment to the register deposit balance, which is for cash customers only.
- \* Corrected wholesale amounts for sales in departments where wholesale is calculated as a percentage discount from retail.
- \* Customer Level 2 or 3 discounts now applied properly for returns.
- \* Eliminated circumstance resulting in balance limit warning when opening a new debit account with balance forward amount combined with a sale..
- \* Corrected for possibility of incorrect display of UPS Incentive Level in Help > About after restoring a backup (incorrect display was "99").
- \* Displayed wholesale amount on Rate Comparison screen no longer inappropriately includes Customer level discount, if any.
- \* Cancellation amounts now posted properly when CashMate+ transactions are cancelled that contain coupons and/or discounts.
- \* Cancellation count now increments by one per cancelled CashMate+ transaction, not by the number of items within the transaction.

- \* Can no longer process a FedEx Ground shipment after access denied to server. Finish button will be disabled, another service must be chosen.
- \* Greatly reduced possibility of access violations or other errors when recording FedEx internet shipments.
- \* Update removes stored FedEx profit margins for pre-February rates, so the FedEx Quick Rate-Setting Utility is now not used for setting retail rates (a post-update-only feature).
- \* Zip codes database updated, including: FedEx Express commits; UPS routing codes; new zips added and obsolete ones removed.

#### Version 3.5.1

-----

- \* Revised UPS ASO Incentive Level discounts supported, including new Levels 8, 9 and 10.
- \* 2002 requirements met for UPS Shipper Labels; MaxiCode compression now supported.
- \* UPS Sample Shipper labels (10) now print actual store information; now identified on labels as "samples only."
- \* Zip codes and UPS commitments updated in database.
- \* PostalMate/CashMate+ now supported in Windows XP operating system environment.
- \* FedEx Ground Sample Labels button removed (no longer part of label approval process).
- \* Arrival Exception Report now truncates long Ship To names to prevent overflow into new field.
- \* To reduce network traffic and incidences of shipments not recalling automatically, CashMate+ register no longer "polls" system for Holds and other status information. "Recall" button will now always be active.
- \* Corrected spelling of Reports Specification screen caption in CashMate+ for Ultimate Report.
- \* Packing Materials and Add-ons for unretrieved StorePack Estimates are no longer lost after rebuilding intermediate tables.
- \* Corrected spelling on System Utilities submenu items "Rebuild Hold Tables" and "Rebuild Intermediate Tables."
- \* Discounts now properly applied on Carrier Pack shipments for Level 2 and 3 customers.
- \* CashMate+: Corrected for multiples of the same item (using the "@" sign) recording as only a single item in certain cases.
- \* Corrected for possible incorrect debit account sale reporting in Register Day closing, X-report, and Register Activity report in cases where another tender type was selected after getting "amount over limit" warning.
- \* Corrected wholesale amounts in Profit Report where a product with enabled inventory tracking, where buy units were less than sell units.
- \* Corrected for taxable amounts by agency being incorrect on receipts in some cases, and for possible inaccuracies if "Tax calculated by item" was not selected.
- \* Dimensions no longer required for FedEx internet shipments, and when entered are no longer sent to FedEx server; eliminates inappropriate rejection of package by FedEx server due to dimensions.

- \* Corrected for possible overwriting tracking number with one from previous FedEx shipment, where a lockup or "blue screen" error occurs after retrieving FedEx StorePack estimate internet shipment..
- \* Tracking number prompt now shows (if enabled) for FedEx Express non-internet shipments, with FedEx Ground internet shipping enabled.
- \* When canceling CashMate+ transaction with shipment(s), corrected for user in some cases not being offered opportunity to have shipment(s) voided in PostalMate.
- \* Corrected for possible access violation when canceling edit of sales tax region.
- \* Corrected for possibility of Sales Report in certain cases not containing a column for each month specified.
- \* Removed non-functional "Track Cost" option on Department Edit screen.
- \* Corrected for inappropriately allowing deletion of customer with multiple accounts.
- \* PA+ report no longer inappropriately includes an extra day beyond selected date range.
- \* Password-protection added in System Utilities for items under Tools > Table Utilities (part of Data Maintenance group).
- \* Update Help files; Help button activated for the Online Transaction Incomplete screen.
- \* Revised PostalMate and UPS End User License Agreements distributed.

#### Version 3.4.1

-----

- \* FedEx Express domestic and international rates updated for rate change effective for FASC locations on 02/04/02.
- \* FedEx Ground rates updated for rate change effective for FASC locations on 02/04/02.
- \* Added availability for FedEx International Economy to 152 new country destinations, and International Priority to Bosnia Herzegovina.
- \* Updated zone and rate data to accommodate the application of rate scales I, K and N to FedEx International Economy.
- \* Arrival commitments now displayed for UPS services to Puerto Rico.
- \* Shipment linked to customer can now have different customer selected in CashMate+ for the register transaction; if no customer for a shipment, customer selected in CashMate+ will be assigned to register transaction.
- \* Additional Handling for UPS will now not be invoked if package weighs less than 10 pounds, unless length exceeds 60" or second-longest side exceeds 30", as per new UPS rule.
- \* "Zone" replaces "Region" in rate chart column headings for FedEx Express services in rate-setting feature.
- \* Updated zip code and commitment data to accommodate new FedEx Service Areas for First Overnight (A2 and A3).
- \* User can now select discount Tiers directly in FedEx Express and Ground Quick Rate-Setting Utilities without pass codes.
- \* FedEx discount "Levels" no longer used -- now Tiers only, as per corporate FedEx directive.
- \* Beta phase begins for modifications to allow use with Windows XP operating system.

- \* When closing Register Day, currency counts entered in Reconcile Cash screen now retained if screen is closed and re-opened (but not if Close Register Day screen is closed)..
- \* "Earliest Delivery Time" info now appears on UPS Shipper Label for UPS Next Day Early A.M. residential shipments.
- \* User can now "undelete" Tax Regions, using System Utilities (Tools > Table Utilities > Undelete Tax Regions).
- \* Quick Rate-setting utilities (USPS, FedEx, FedEx Ground, USPS) now generate separate log files (i.e., FedExGround\_QuickRateSettingLog.txt) instead of overwriting each other's.
- \* For FedEx internet shipments, if prompted for phone number the entered number now is now automatically saved in the ShipTo record.
- \* Service Display settings restricted to Master stations for networked systems.
- \* Additional Handling charges now displayed in separate field on UPS Manifest Detail report instead of in "Del. Area Surcharge" field; now displays wholesale amount instead of retail.
- \* Mass Late Fees now password-protected for systems with enabled security (part of Billing & Late Fees group).
- \* Transaction Hold no longer password-protected.
- \* Store Information screen: Character limit for FedEx Ground account number increased from 7 to 20 characters.
- \* Network data updates can now be initiated from Auxiliary as well as Master stations (System Utilities > Tools > Initiate Workstation Update)..
- \* Data changes on Master station will now result in network update for Auxiliaries upon next shipment from Auxiliary; user will be notified.
- \* Feature for disabling call waiting (Tools > System Setting > Communications tab) works again.
- \* Corrected for Additional Handling not getting invoked when appropriate if longest dimension was entered into second or third edit box on Package Dimensions screen.
- \* Corrected for shipping disclaimer not printing on CashMate+ receipt.
- \* Corrected for not being able to print FedEx Ground sample labels on some systems.
- \* Corrected for Saturday Pickup not being offered when appropriate in Rate Comparison for certain UPS Next Day Air services.
- \* Corrected for packages not appearing in the Retrieve StorePack Estimate screen after rebuilding intermediate tables in System Utilities.
- \* Corrected for not being able to void shipments unless "Show all previously voided shipments" box was checked.
- \* Corrected for FedEx Express Carrier Pickup causing FedEx Ground to also be set for "Open for next day."
- \* Open for Next Day no longer inappropriately set for FedEx Ground if Express pickup was done first, and as last pickup of day.
- \* Corrected for possibility of FedEx internet shipment getting label for previously voided shipment.
- \* Corrected for cash drawer not opening for checks, account charges or credit cards, with Certain Receipt Settings selected.

- \* Corrected for FedEx shipments getting inappropriately voided from CashMate+ in some cases where transactions with multiple shipments were canceled. Voiding of FedEx internet shipments can now be voided only from PostalMate, not from CashMate+.
- \* Corrected for UPS shipments getting inappropriately voided where an error condition existed for a FedEx internet shipment and the FedEx pickup was done before UPS.
- \* Corrected for possibility of voiding another shipment when a FedEx internet shipment is voided by user.
- \* Corrected for statement printing for another customer, when canceling the printing of a single statement for a customer that had no previous statement.
- \* If FedEx Home Delivery shipment is voided because user twice elects to not enter a required valid phone number, the following shipment will not be inappropriately voided.
- \* Voiding CashMate+ transaction from station other than where recorded no longer results in incorrect dollar totals when closing Register Day.
- \* Restore from PostalMate backup no longer loads twice.
- \* Register Activity report no longer calculates incorrect totals for departments containing the words "Other" or "Calculation" in their names.
- \* Temporarily removed "Reverse Payment" option for Credit Accounts; to be re-implemented in future version.
- \* Update removes stored UPS profit margins for 2001 rates, so the UPS Quick Rate-Setting Utility is now not used for setting retail rates (a post-update-only feature).
- \* Updated Help files. PostalMate and CashMate+ Help windows no longer always on top.
- \* CM+ version 1.3.2 (02/02/02): When closing Register Day, amount given in change since opening Register Day no longer reflected as shortage. Problem was only in version 1.3.1.

#### Version 3.3.3

-----

- \* Corrected service indicators in tracking numbers for UPS residential air services(was "00").
- \* Corrected for missing service icons on labels for UPS residential air shipments.
- \* Edits for UPS Saturday Pickup and Delivery surcharge rates are now applied to new residential air services.
- \* PLD message now properly includes consignee attention info for UPS residential air services.
- \* Corrected package counts on UPS Bar Code Summary label when pickup includes UPS residential air shipments.
- \* Added workstation-specific information for configuration message uploaded to UPS when appropriate.

#### Version 3.3.2

-----

- \* Corrected for first UPS PLD upload attempt not completing after updating to 3.3.

\* CM+ version 1.2.2.1 (after 01/02/02): Register Activity Report performance increased if Cash Register Day is closed; warning displayed if open.

### Version 3.3.1

-----

- \* UPS domestic and international rates updated for rate change effective 01/07/02.
- \* FedEx Signature Release implemented as an Add-On.
- \* Retail rates can now be set for Delivery Area Surcharge (Edit > Shipping Rates > Surcharges).
- \* Added support for FedEx Ground Home Delivery rural surcharge (Delivery Area Surcharge).
- \* Additional Handling now invoked automatically, based on dimensions, and is now a surcharge instead of an Add-On.
- \* Updated 5-digit zip code database with changes to: zip codes; UPS/FedEx commitments; UPS/FedEx Delivery Area Surcharge designations; UPS Routing Codes; FedEx Home Delivery availability.
- \* User no longer required to proactively re-enable FedEx internet shipping after getting error on shipment; For StorePack Estimate retrievals, manually entering the tracking number will change the shipment to Airbill.
- \* Accounts Receivable report now has line for totals at end.
- \* Charges for Add-Ons now in brackets on CashMate+ receipt; C.O.D. amount now shown.
- \* Removed extraneous empty space at top of receipt.
- \* Updated holiday info for UPS and FedEx for 2002.
- \* Added support for UPS Worldwide Expedited to Peru.
- \* Added Yugoslavia to country file (same as Serbia-Montenegro).
- \* Added support for UPS Worldwide Express to Serbia-Montenegro.
- \* Revised maximum Parcel Post dimensions to Azerbaijan, as per 11/29/01 USPS revision.
- \* Number of open Credit and/or debit accounts now displays on Find Customer screen for the selected account (CashMate+ only).
- \* Improved performance on StorePack estimate retrievals.
- \* Improved performance on viewing a package transaction from the Matching Packages list using the Find Package feature.
- \* User now prompted to confirm deletion of a vendor.
- \* Vendor Listing and User Listing reports now sorted by name rather than record order.
- \* Product Listing report now displays "N/A" in the "PackMat" column for products that are not packing materials, instead of "Not."
- \* Cursor changes to hourglass until Register Settings screen displays after selecting menu item Tools > Options > Register Settings.

- \* Hourglass displays while waiting for User Listing and Register Day Summary reports.
- \* Corrected for possible inaccurate count of account charges on X-report and Register Activity report.
- \* Corrected for possible inaccurate transaction count on Register Day Summary report.
- \* UPS labels now reflect new URC version and date (16.0A 01/2002).
- \* UPS Fuel Surcharge Utility now has 0.75% default instead of 1.25%, as per change effective 12/10/01.
- \* Shipments now appear on CashMate+ receipt in same order as transacted.
- \* No longer necessary to click on cell for customer on Find Customer screen to display account info, as long as cell is highlighted and customer has at least one account.
- \* User can now properly cancel re-printing of statements.
- \* Mass Late Fees operation now unavailable on auxiliary workstations.
- \* Internet shipments no longer rejected by FedEx server due to: Extra-long Ship To contact names or cities; phone numbers with extraneous characters; weight being less than or equal to .8 ounces.
- \* Corrected for inappropriate requirement to have a complete Ship To address when shipping FedEx Express using airbill.
- \* Corrected for possible error condition when attempting to print Ultimate Report in CashMate+ if Department order has not been set by user.
- \* Corrected for department totals not being included in the PA+ report for StorePack transaction products in CashMate+ reports.
- \* Corrected for possible error when restoring backup.
- \* Corrected for StorePack shipment on network auxiliary using packing material pricing from local rather than master table when Product IDs match.
- \* Corrected for shipments getting inappropriately voided when a FedEx Ground pickup was done with an unretrieved FedEx Ground estimate in the system.
- \* Corrected for possible "list index out of bounds" error at the StorePack screen after doing numerous previous StorePack transactions.
- \* Button to open cash drawer now works on Open Register Day screen.
- \* Corrected for phantom shipping transactions (with a Pkg ID of "0") that cannot be recalled from another station across network.
- \* Update informs user if Products are found that aren't mapped to departments.
- \* Updated Help files.

Version 3.2.1

-----

- \* Report added: Package Transaction Listing by Customer.

- \* Generic Shipping Label now in 'landscape' format; Address 1 and Address 2 now on separate lines.
- \* No longer required to enter leading zero in CashMate+ register for amounts less than 10 cents.
- \* Customer Data Export feature added to System Utilities (File > Export > Customer Data).
- \* User selection added in System Utilities for choosing PC Synergy server preference.
- \* Enhancements and corrections to statements:
  - Greatly increased performance when creating by Statement Group.
  - A due date other than the default can now be selected.
  - Can now reprint by Statement Group.
  - "\$0.00" now suppressed on detail lines for memos
  - Page numbers added.
  - When store information is not included, space at top now remains (for use with letterhead).
  - Header added for multiple pages to include customer/company information.
  - Remove intermittent superfluous detail lines "No Account Activity This Billing Period."
  - Late fee warning now prints only on the last page where there are multiple pages.
  - Late fee warning no longer prints when balance is zero or negative.
  - Corrected for late fee in some case being incorrect when based on percentage.
  - Balance forward amount will no longer reflect overpayment.
- \* Address on FedEx Ground sample COD return labels revised.
- \* Revised History tab on Edit Customer screen in CashMate+. Buttons now lead to Register Transaction History or Accounts History screens.
- \* User now gets warning upon CashMate+ launch if computer date/time is earlier than when CashMate+ was last run.
- \* Wholesale rate for FedEx Ground insurance increased to \$0.50 per \$100 of DVU (up from \$0.35), for change effective November 11/12/01.
- \* Set proper commitments for UPS air services to accommodate special Thanksgiving holiday schedule.
- \* Maximum weight for USPS Global Express Mail services to Belarus reduced from 66 lbs to 44 lbs, as per IMM change effective 9/20/01.
- \* Maximum insured value to Georgia for USPS Parcel Post services changed from \$675 to \$1350 as per IMM change effective 4/5/01.
- \* Maximum insured value to Sweden for USPS Parcel Post services changed from \$5000 to \$1350 as per IMM change effective 9/20/01.
- \* Revised layout of UPS Commissioning and FedEx Subscription screens to accommodate longer store names, contacts and addresses.
- \* For FedEx Ground internet shipments, corrected for possible "Customer Reference number cannot exceed 35 characters" error from server when transmitting transaction.
- \* For StorePack Later shipments using FedEx internet, now transaction is not sent to server until estimate is retrieved.
- \* Incorporated changes in UPS ASO discounts into the UPS Quick Rate-Setting Utility in System Utilities. Affects Levels 4-7 for Worldwide Express and Canada Express.
- \* User login in CashMate+ now revised to resolve possible conflict of user name with product/department shortcut key.

- \* Reduced frequency in which CashMate+ polls to check register open/close status and for transactions on hold, to increase network performance.
- \* User now prompted to print X-Report when closing Register Day; X-Report no longer available for workstation where Register Day is closed.
- \* Enabled online Help for Department Mapping screen in System Utilities.
- \* Inappropriate line-wrapping no longer occurs on Citizen printer for Deliv.Conf.w/Adult Sig. or when opening Register Day.
- \* Corrected for Customer ID not being assigned when customer is added in CashMate+ with no first or last name (and the 3.2 update adds IDs for these records).
- \* Corrected for possible access violation when retrieving StorePack on network.
- \* Corrected for possible "Record/Key Deleted" error on shipment in PostalMate for customer just edited in CashMate+.
- \* Corrected for possible "EDBEngineError" when clicking the Register button from shipping and/or the shipping button from CashMate+.
- \* Corrected for possible "List Index Out Of Bounds" error when doing a UPS carrier pickup
- \* Corrected for possibility of packages with Oversize dimensions not being recording in the database or in PLD as Oversize, when keypresses done in a certain way in Rate Comparison.
- \* Corrected for product not getting added as line item when using "Find Product" button in Legacy interface.
- \* Corrected for possible "Operation not applicable" error" when making an account payment in Legacy interface.
- \* Corrected for possible account payment not posting, or for customer not being assigned to a transaction, when using Legacy interface and pressing the Enter key prior to selecting the customer.
- \* Corrected for possible inaccuracies in some for "Due Date" on Accounts Receivable Report.
- \* Amounts on Accounts Receivable Report now reflect Current Balance plus late fees, instead of previous balance from last unpaid statement (which was in some cases inaccurate).
- \* Account payment for amount exceeding oldest unpaid statement, is now applied to other unpaid statement(s) if they exist (older statements first).
- \* Credit accounts can longer have zero or negative balances and still be considered Past Due or Delinquent.
- \* Account Activity History display (and associated report) now properly lists due date for statements instead of listing balance twice.
- \* Reverse account Credit now works properly.
- \* Removed "Reset Register Day" feature from System Utilities (no longer necessary).
- \* "Check and Repair All Tables" feature in System Utilities no longer disables other utilities (i.e., fuel surcharge utilities) until System Utilities was re-launched.
- \* Corrected for possible "Field Flag\_1 Not Found" error in "Rebuild Intermediate Tables feature in System Utilities.
- \* AIM reporting changed to conform to revisions in corporate department list.

- \* PA+ reporting changed to conform to revisions in corporate department list.
- \* UPS SecondaryDNS updated on systems with older Secondary DNS, to reduce incidence of upload problems.
- \* Updated Help files.

#### Version 3.1.1

-----

- \* Implemented FedEx Bonus Weight Envelope feature, for rule change effective Oct. 1, 2001 for FASC locations.
- \* All FedEx "Letter" terminology changed to "Envelope," as per FedEx corporate directive.
- \* Weight limit on FedEx Pak packages reduced from 150 to 20 lbs, as per FedEx directive.
- \* FedEx Ground A.O.D. add-on no longer supported.
- \* Implemented internet shipping features for FedEx Express and Ground for beta testing.
- \* Added support for FedEx Home Delivery (internet shipping only -- see above item).
- \* FedEx Ground Commercial now available for internet shipping only -- see above items).
- \* Added Product "Add and Duplicate" feature.
- \* Can no longer print statements if the Register Day is open, or from a network auxiliary station.
- \* Focus now set to Total button when recalling shipment.
- \* When "Last Package's Label(s)" button is pressed in Everyday Tools (formerly "Reprint Last Label(s), all labels for that package print, not just last one.
- \* Password protection added for removing affiliation from certain Store Groups.
- \* Register Activity report can no longer be printed from Auxiliary stations.
- \* PostalMate menu item Edit > Product is now enabled on Auxiliary stations.
- \* Default day has been changed from previous day to current day for CashMate reports: Profit; Register Transaction; Ultimate.
- \* Corrected problem of cash register line items appearing out of original order in certain cases on statements and/or on receipts when transaction has been on hold and then recalled.
- \* Enhanced error handling for when scale hardware does not match assignment in System Settings.
- \* Register Total screen no longer displays "The payment amount will not cover the charges," or has grayed out "Finish" button, when amount is actually correct but not rounded properly internally.
- \* Sales Tax Report no longer includes non-taxable sales in the total taxable sales amount (the total tax and gross were ok).
- \* Customers can no longer be deleted if linked to an open credit or debit account.
- \* Corrected for statements not printing when an account in the group had a previous balance but no current activity.

- \* Corrected for statements printing for accounts with zero balances even when "Print for zero balances" option was deselected.
- \* Corrected for statements showing incorrect detail in some cases for transactions posted in version 3.0.5.
- \* Corrected for the Arrival Exception Report returning N/A for all packages in some cases.
- \* Corrected for packages shipped on Auxiliary stations in some cases being excluded from Carrier Pickups (and then included in the next one).
- \* Register Sales Report now subtracts Returns from total amounts.
- \* Corrected for X-Report displaying incorrect Open Date (of 12/30/1899) in some cases.
- \* Corrected for wrong product coming up in some cases when using a scanner from the Find Product screen.
- \* Corrected for declared value not appearing correctly in the detail in some cases on the Register Transaction Activity Report, statements and receipt re-prints, when multiple shipments were in one register transaction.
- \* Corrected for some systems being unable to launch System Utilities feature: Tools > Table Utilities > Rebuild Selected Table.
- \* NETDIR now re-set upon PostalMate and/or CashMate+ launch if blank or C:\, to increase reliability of future updates.
- \* Appended End-User License Agreement for UPS Licensed Materials to PostalMate End User License Agreement in license.txt.
- \* Updated help files.

#### Version 3.0.5 [beta]

-----

- \* Added support for FedEx Delivery Area Surcharge.
- \* Indicator for Delivery Area Surcharge for UPS/FedEx now displayed in Rate Comparison, when applicable.
- \* Increased performance on Hold/Recall, and in sending shipments to CashMate+.
- \* Added Register Day Summary feature to CashMate+.
- \* Added Receive Products feature to CashMate+ (Tools > Receive Products).
- \* Register Transaction History screen now has user-specified date range.
- \* Transactions on Register Transaction History screen now listed in reverse chronological order (most recent at top).
- \* Added additional 'amount due' display on Register Total screen.
- \* User can now select order of Departments on reports (System Utilities).
- \* Updated 5-digit zip code database to include new zip codes, and any applicable UPS/FedEx commitment data for them.
- \* ID display on Edit User screen (System Utilities) can now display more than 2 characters.
- \* Corrected intermittent problem of CashMate+ screen not coming to front when Register button pressed in PM2000.

- \* Implemented restriction on deleting a department that has products mapped to it.
- \* Four new table utilities added (System Utilities > Tools > Table Utilities):
  - Rebuild Selected Table
  - Rebuild Hold Tables
  - Rebuild Intermediate Tables
  - Remove Duplicate Transactions
- \* Original table utility now accessible from System Utilities > Tools > Table Utilities > Check & Repair All Tables; cosmetic changes made.
- \* Increased efficiency of memory usage for CashMate+.
- \* Corrected for alternate address not printing on statements when appropriate.
- \* Conversion program no longer converts late fee amount causing statement balance and current balance mismatch.
- \* Corrected for possible incorrect posting of Oversize or dim wt posting incorrectly in specific circumstances in ProShip, where user entered or changed dimensions without pressing OK.
- \* Corrected for packing materials for StorePack shipments not carrying over to register under certain circumstances.
- \* Optional arrival day information now suppressed on receipts for international shipments.
- \* Split tender now works properly.
- \* Can no longer charge to an account an account payment transaction.
- \* Corrected for possible "Arithmetic in filter expression not supported" error when attempting to print Register Activity report.
- \* Removed the date selection for Register Activity report. Only the last register day closed is saved.
- \* Corrected for the register ID on receipts always being 1 on the first receipt after launching CashMate+.
- \* Corrected for customer not posting with transaction when account payment was attempted for customer with no account, then another payment type was chosen.
- \* Corrected for possible "Invalid Pointer Operation" or Access Violation after closing a register day under certain conditions.
- \* Corrected for possible problem of transactions on hold not recalling under certain conditions.
- \* Corrected for register ID's starting at 131 instead of 1.
- \* Corrected for not being able to adjust inventory on a product to quantity of "0."
- \* Corrected for spacing problems on Late Fee warnings on statements.
- \* Waiving of late fee no longer listed twice on statements.
- \* Statements now show "No Payment Due" where the balance calculates to zero or negative.
- \* Account name on statements moved away from address area; address info moved to better fit window envelopes.
- \* Alt address on statements no longer contains info from regular address.

- \* Statements now show "Place In Mailbox" where the Bill To is set to mailbox.
- \* Corrected for possible case where statements for zero-balance account show activity belonging to another account.
- \* Corrected for possible incorrect sales tax where there were two taxable register items and one was voided.
- \* Corrected for tax not being applied on total amount of sale if percentage is 1% and items are less than 55 cents.
- \* Accounts with zero balance no longer being displayed on Edit Customer screen as delinquent.
- \* Shipments are no longer put into Hold queue when system is set to not send shipments to CashMate+ register.
- \* Corrected for an account charge not appearing on the register close screen properly under certain circumstances.
- \* User name now appears in correct format on receipt when re-printed from Register Transaction History.
- \* Voids now appear on receipt when re-printed from Register Transaction History.
- \* Accounts can no longer added for a new customer unless the customer has actually been added to the database.
- \* Corrected for quantity being reduced by one when using the @ control in CashMate+ in a sales transactions (for certain numbers only).
- \* Corrected Sales Tax Report not picking up all taxable transactions under certain circumstances.
- \* Backup now checks for sufficient space on the target drive.
- \* Corrected for possible program lockup when setting up Auxiliary workstation on network.
- \* Corrected for Enter key inappropriately opening Register Total screen when logging on user under certain circumstances.
- \* When closing register day, "Acct Charges" field now correctly includes times that had discounts.
- \* Register Activity Report now includes Method 2 calculation and calculation of overages.
- \* Updated help files.

#### Version 3.0.4 [beta]

-----

- \* Corrected problem of some activity not appearing on statements under certain circumstances.
- \* Removed CashMate+ menu item Tools > Register Summary until version 3.0.5.
- \* Corrected for some account history records not converting from PM-DOS in under certain circumstances.
- \* Department set to HASH type no longer displayed as Revenue type.
- \* Edit Department screen now defaults properly to General tab.
- \* Corrected version numbers on CashMate+ and System Utilities programs.
- \* CashMate+ exe version now displays in System Check.
- \* Hourglass now displays when Sales Tax Report is being generated.

- \* Updated CashMate+ help files.

#### Version 3.0.3 [beta]

-----

- \* Increased performance on Close Register Day.
- \* Eliminated "Cannot focus a disabled or invisible window" error when clicking Register button on New Shipment screen.
- \* Corrected calculation of wholesale rate when associated department contained a wholesale cost percentage other than blank or zero.
- \* Corrected problem where clicking 'reconcile' button on Close Register Day screen would sometimes display reconciling screen for a different tender type.
- \* Corrected miscalculations on X Report and Register Activity Report.
- \* Eliminated "Invalid variant type conversion" error in Close Register Day.
- \* Corrected being unable to Close Register Day containing transactions where sales tax was overridden with "No Sales Tax" choice.
- \* Finish button no longer inappropriately disabled when certain tender type(s) selected on some transactions.
- \* Can now select receipt printer for individual workstations.
- \* Eliminated error condition resulting from exiting Close Register Day screen using window's "x" control.
- \* Cash register function 'No Receipt' now works in Legacy interface.
- \* Can now enter text in Hold screen without first clicking in edit box.
- \* Discounts entered on Package Details screen now carry over into CashMate+ register.
- \* All reports specified by Register Day now properly use final closing date of Master, when on networked system.
- \* 1899 date no longer appears for some matching packages when doing a Find Package.
- \* Day of week (Mon, Tue, etc.) replaces date in default backup filename.
- \* Corrected for problem of getting successful backup message when files were skipped.
- \* Network update now occurs properly when changes were made in PostalMate on Master station.
- \* Corrected miscalculation of wholesale cost on packing materials for StorePack shipments, when product(s) not inventory exempt.
- \* UPS Quick Rate-Setting Utility now sets Tier rates for Canada Expedited, Canada Express and Canada Express Letter.
- \* Register Activity Report now works.
- \* Updated Help files.

#### Version 3.0.2 [beta]

-----

- \* DOS Conversion program added.
- \* Network functionality re-enabled.
- \* Legacy interface implemented in CashMate+
- \* Mass Late Fees and corresponding report added.
- \* Register Activity Report added.
- \* Register Deposit Report added.
- \* Global mapping of Departments for Products added.
- \* Choice added in Register Settings to print or not print statements for accounts with negative and/or zero balance.
- \* Closing of Register day enhanced, including capability of closing for any network workstation from the Master.
- \* Backup/restore enhanced to include: additional files; new default filenames; Events Log includes 'computer signature' when Restore is a different computer's backup.

#### Version 3.0.1 [beta]

-----

- \* Initial deployment of CashMate+ (Windows-based POS); DOS-based POS no longer integrated or supported.
- \* Implemented Hold/Recall across network, including shipping transactions.
- \* Automatic \$ discounting for Products by Customer, quantity, promo date.
- \* Automatic % discounting for Departments by Customer.
- \* Dialogs now follow position of main program screens
- \* Moved serial # entry and validation from install to program launch.
- \* Icons and other graphics now transparent.
- \* Help files upgraded to WinHelp 2000 style. "SystemUtilities" help files renamed to "SysUtil."
- \* System Utilities now includes:
  - FedEx Express Quick Rate-Setting Utility no longer inappropriately applies tier/level discounts to First Overnight or First Overnight Letter (currently exempt).

#### Version 2.4.1 02/21/01

-----

- \* FedEx Express rates updated for rate change effective 03/01/01 (for FASC's).

- \* New zone (scale) structure for FedEx Express international services implemented.
- \* User no longer prompted for additional address info for UPS services to Puerto Rico under any circumstances.
- \* FedEx Ground and Express Tiers and Levels displayed, if applicable, in Help > About.
- \* Shipments for up to 150 lbs now allowed for FedEx Priority International and Economy International.
- \* For services requiring complete ShipTo addresses: if selected Ship To record lacks required information, user will be prompted only to enter missing information, rather than to select a new Ship To record.
- \* Deactivated FedEx Ground services to Puerto Rico, Mexico and Alaska/Hawaii, as services to these destinations are have been suspended by FedEx Ground. (Note: service to Alaska has not been suspended, but Alaska and Hawaii are combined in the program.)
- \* Deactivated FedEx domestic "Pak" and "Packet" services with special one-pound rates, which no longer exist.
- \* Deactivated USPS Priority 1-lb flat rate service; this service/package was documented by USPS but apparently not implemented.
- \* System Utilities program Version 1.8 distributed to include:
  - FedEx Ground Quick Rate-Setting Utility now supports setting of wholesale rates by Tier/Level.
  - FedEx Express Quick Rate-Setting Utility; supports setting of wholesale rates by Tier/Level
  - FedEx FASC Band Rate import feature removed (replaced by Tier/Level features in Quick Rate-Setting Utilities).
  - UPS Quick Rate-Setting Utility now sets correct wholesale rates for Next Day Air Saver Letters for ASO Levels 2 through 7.
- \* System Check program redistributed to ensure latest version (5/16/00) on all systems.
- \* Corrected for possible error "Table TabPagexx: Field 'Saturday Delivery' not found."
- \* Corrected for USPS Global Priority Canada Large and Small Envelope services to Canada not displaying in Rate Comparison.
- \* Corrected for access violation error when trying to reprint generic shipper label for inactivated service.
- \* "Open for next day" screen now comes up for FedEx Ground carrier pickup even if no packages were pending.
- \* For FedEx Ground carrier pickups, user now prompted to select whether or not pickup is last one for the day.
- \* For UPS 2nd Day Air Letter shipments, UPS label now properly displays "LTR" in place of weight.
- \* UPS Manifest now includes only packages selected on Carrier Pickup package count screen (same as PLD upload and Pickup label).
- \* Corrected for possible "List index out of bounds" error on Carrier Pickup package count screen for UPS, if not all packages due for pickup were selected.

- \* UPS domestic and international rates updated for rate change effective 02/05/01.
- \* FedEx Ground rates updated for rate change effective 02/05/01.
- \* Added support for FedEx Ground Oversize II.
- \* UPS Call Tag changed to UPS Returns Plus - 3 Attempts. Removed pickup date selection as per new UPS specifications.
- \* Updated 5-digit zip code database, including: New zip codes; UPS and FedEx Express commitments; UPS routing codes; and UPS Delivery Area Surcharge info.
- \* Updated Country database, including: UPS and FedEx international zone info; corrected USPS Letter Zone for England.
- \* Updated Canada FSA database, including: New FSA's; UPS and FedEx zones.
- \* New service indicators for UPS tracking number calculation.
- \* Added weight to UPS Shipper Label (or "LTR" for Letters). Other modifications to meet new UPS requirements: Earliest delivery time for Early A.M.; Adult Signature Required for Deliv. Confirmation (when applicable).
- \* Modifications to UPS Pickup Summary Bar Code Label to meet new UPS requirements; now includes pending PLD info.
- \* Update holiday info for UPS and FedEx.
- \* UPS Incentive Level displayed, if applicable, in Help > About.
- \* User now prompted for 'earliest delivery time' on UPS Next Day Early A.M. shipments; time will print on Shipping Label.
- \* User now prompted for first and/or last name for ShipTo on UPS Next Day Early A.M. shipments, but only if ShipTo record does not already contain either a first or last name.
- \* User now prompted for tracking number when Delivery Confirmation for Priority Mail is selected in P.O. Letter screen.
- \* UPS services to Puerto Rico now require waybill.
- \* Updated USPS international rates to match revised USPS documentation, including: all GXG rates (Document and Non-Document); some Global Priority rates; insurance rates for Canada Parcel Post.
- \* Updated Help files.
- \* System Utilities program Version 1.7 distributed to include:
  - UPS Quick Rate-Setting Utility added.
  - FedEx Ground Quick Rate-Setting Utility added.
  - USPS Quick Rate-Setting Utility removed.
- \* Alternate PLD Upload corrected to include "control.ups" file.
- \* Corrected possible data discrepancy in rate references for FedEx Ground and GXG insurance for systems with user-added insurance carriers (2.2 update problem).
- \* Additional shipping carriers can no longer be added with the same name of any existing carrier.
- \* Fixed dimension limits not being recognized for USPS Parcel Post Airmail and Economy.

- \* Retail rates now display properly for Aerogrammes and Postcards on P.O. Letter screen, and proper zones applied.
- \* 'Round to Next Nickel' feature in rate-setting now works properly when original rate end in "1" or "6."
- \* When printing rates for weight-based services, report now includes rates for services with more than 11 zones.
- \* "User Defined" prompt now limited to 24 characters and COD "Pkg Ref Number" limited to 10 characters, to avoid possible line-printing problems on Ship Info label and UPS Manifest for too many characters.
- \* User now restricted from exiting rate-setting screen in edit mode access violation when changing shipping rates, to avoid possible access violation.
- \* USPS Global Priority and Global Express now display on Rate Comparison for Canada shipments, when appropriate.
- \* User no longer allowed to edit FedEx Ground Published rates.
- \* Multiple Place Name dialog now centers properly.
- \* Corrected for FedEx Standard Overnight displaying in Rate Comparison to certain Alaska/Hawaii zip codes where service is unavailable (was displayed as blank cells).
- \* Corrected for FedEx Saturday retail/wholesale surcharge rates not always recording in database after being set.

Version 2.2.1 12/21/00

-----

- \* USPS domestic and international rates updated for rate change effective 01/07/01.
- \* New USPS international services added, obsolete services inactivated.
- \* USPS Standard(B) renamed to Parcel Post; Special Standard (Book) renamed to Media Mail; Express Mail International renamed to Global Express Mail.
- \* International Services Info feature added to Rate Comparison and P.O. Letter screens.
- \* USPS Delivery Confirmation now supported.
- \* USPS Priority using 2-lb. flat rate envelope can now be insured.
- \* USPS weight and insurance limits per country updated to include changes in Postal Bulletin through Nov. 30, 2000.
- \* 15-lb rate now used for USPS Parcel Post (domestic) when package is less than 15 lbs and greater than 84" length + girth (referred to as "Oversize" in program).
- \* Shipping info more visible on Package Details screen.
- \* Revised icons for USPS Return Receipt (domestic & international) and Certified Mail.
- \* Visual indicator for closing of PostalMate 2000 more consistent.
- \* Corrected viewing and editing of Add-On rates when accessed from Edit Carrier.

- \* New End User's License Agreement distributed.
- \* System Utilities program Version 1.6.4 distributed to include USPS Quick Rate-Setting Utility added to allow users to apply existing profit margins/markups to new USPS domestic rates.
- \* Updated help files.
- \* Country display corrected on Find Ship To screen when search criterion is by country.
- \* Previously-discontinued service USPS Standard Mail A (3rd Class) no longer viewable from rate-setting screen.
- \* Retail rates for USPS Registered Insured and Canada Registered now equals wholesale rates instead of \$0.00 if no insured amount entered.
- \* Retail Constants for USPS Registered Insured in .01 through 100 range can now be set and saved properly from Edit > Shipping Rates > Add-Ons.
- \* Corrected for weight of packing materials not being included for StorePacks in some instances without interfaced scale.
- \* Corrected for possible "invalid floating point" error at Rate Comparison in some case when manually entering weight in ProShip mode, with no scale interfaced.
- \* Find Ship To screen from menu no longer prompts user to "Enter Last Name" when search criterion is not Last Name.
- \* Corrected for rates not calculating in ProShip, with no scale; under certain circumstances weight had to be entered twice.
- \* Find Customer and Find Ship To screens no longer display all records instead of just those match search criterion selection under certain circumstances.
- \* Corrected for possibility of incorrect Ship To or Customer being selected if default sort fields values were deleted.
